Activity

Name of Activity: State Strategic Plan for Crown Land
Our Reference:: SSP Crown Land

Please provide your details

1. First name: [Redacted]
2. Last name: [Redacted]
3. Do you identify as Aboriginal or Torres Strait Islander?: [Redacted]

4. Are you completing this survey as part of an organisation?: No

5. Organisation: [Redacted]
6. Postal/street address: [Redacted]
7. Suburb: [Redacted]
8. State: [Redacted]
9. Postcode: [Redacted]
10. Email: [Redacted]

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I care about Crown land management as a resident of New South Wales, Other

Other: [Redacted]
Wamboin/Bywong in the QPRC. We appreciate being able to walk on these greenways, and we are also happy to see them used by other walkers, joggers or horse riders. The greenways also serve as habitat for wildlife and as a buffer between us and neighbours.

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience:	Very important
Strengthen and support evolving community connections:	Important
Work with Aboriginal communities to realise the potential of their land rights:	Important
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	Maintaining walkways for people to exercise, free of motor vehicles of any sort.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Important
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Neutral
Prioritise the use of Crown land for green and open space in urban areas:	Important
Use Crown land to expand access to affordable housing:	Of minor importance
Support and restore environmental values on Crown land:	Very important
Manage Crown land to build resilience in a changing climate:	Important
Sustain the places where people come together:	Neutral
Partner with the organisations that serve our communities:	Neutral
Strengthen and uphold compliance to ensure a fair go:	Neutral
Make Aboriginal land transfers a priority – and see them as an opportunity:	Neutral
Contribute to the ongoing recognition of native title rights:	Neutral
Explore co-management of land to generate mutual benefits:	Neutral
Collaborate with Aboriginal groups in each place to improve outcomes:	Neutral
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department	Greenways as open land in rural or regional areas are important, too, along with open spaces in urban areas. We value our greenways as a place for joggers to conduct fun runs, neighbours to meet for long-distance walks, and horse riders to enjoy riding without threats from motor vehicles. I cannot

should address in the State Strategic Plan?: stress enough that most of us living in Wamboin/Bywong would not want to see the greenways opened to vehicular traffic of any sort, including motor bikes. We treasure the quiet resource that are our greenways.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures: Important

Reduce red tape for government entities managing Crown land: Important

Provide tools and resources to volunteer Crown land managers: Important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

In the future, rather than putting out some long, detailed report, please just share with communities your intentions in a concise manner. Sadly, many of us are suspicious of government initiatives, especially if they come with long-winded reports that no one, even the most literate of us, wants to read. My immediate fear on learning that changes were perhaps planned for the Greenways in Wamboin and Bywong was that they would be opened to motor vehicles or that they would be sold off to the highest bidder, including neighbours whom we would prefer not to share a fence-line with. Even after leafing through your 72-page report with its lovely photos, I can't determine that this will not be the case.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Please, just let us know (1) if there is any possibility that Greenways in Wamboin and Bywong will be sold to anyone, including neighbours, and (2) if there are any plans to cut down trees on the greenways and then open them to motor vehicles. If neither of these things eventuates, we will be happy, and we can put off plans to move out of the area. Thank you.

Other:

12. What use/s of Crown land do you value?: Community use, Aboriginal land rights, Other

Other:

I want to see some real effort put into looking after country (the land). This means a lot less land clearing, and a lot more working with the natural environment. Promote community environmental management. Facilities to help clean, maintain and manage existing natural landscapes instead of clearing and building. I'd also like it if the consultations with the Australian Aboriginal communities were actually taken on board instead of ignoring us because it doesn't fit you plan, but nobody expects that of you. We need to be looking after country, not using it.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Neutral

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:
Less land clearing. It should. Not be the responsibility of crown land managers to provide opportunities for economic growth. This is crown land not private land so that is can be looked after. We need environmental priorities. Focus on Koala habitats, wallaby bridges, animal sanctuaries so that we can be a part of the only reason this country is worth being a part of: the incredible and unique wildlife. Don't get caught up in the race for economic and industrial growth, that's not what this land was meant for. Our culture and history in Australia comes from the natural environment and all you want to do is clear it so you can make money and say you've done good.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Of minor importance

Expand regional tourism: Neutral

Assist new sustainable energy, resources and infrastructure projects: Neutral

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Neutral

Sustain the places where people come together: Neutral

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Neutral

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Land clearing should only be undertaken if it is for the improvement of the health of the natural environment. This does NOT include industry or most infrastructure. We want the birds and bees back not another damn supermarket. We want life not concrete. We need projects that compliment the natural environments (tourism will follow as a side-effect), showcasing and protecting our beautiful country instead of exploiting it for economic and industrial growth. Some of your above statements are far too vague to be considered at all. Compliance is your job, if your plan is to get better at your job, then I'd say you're right, but if a 'fair go' means giving more land and rights to companies than I think you're full of it, but that statement could mean both. Nobody's gonna read this but it's something I need to say. We live in a very divided state. A lot of us don't trust what the government say they'll do at all, and the other half of us trust what you say like it's gospel. You need to work on being the best you that you can be before expecting everyone to feel the same. These reviews will all be varied, but most (like mine) will be a bit frustrated. Please don't ignore them. Our points are as tired as we are, but they're still relevant and poignant. We're sick of begging for something positive.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.:

Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:

Standardise leases and licensing for common activities:

Simplify licensing for domestic waterfront structures:

Reduce red tape for government entities managing Crown land:

Provide tools and resources to volunteer Crown land managers:

Build understanding of native title:

Engage and support a new generation of Crown land managers:

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

This whole thing is so obscured in jargon and fluff that it's impossible to know your true aims here. You've got a perfect system of deception here which allows both for a potentially excellent management system, but also a very destructive and economically prosperous one, but not both. For transparency, start by telling everyone how much land you plan to clear, how many animals will be displaced and how much land will be lost to companies/private groups/ housing.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

It's a very government plan of telling us exactly nothing about the specific plan. After reading all 72 pages I can conclude that you'll have the ability to do whatever you want, and you'll flavour it the way you want to. Your plan is as concrete as a breeze and you'll soon "realise" that you can't prioritise industry and environmental strategies. Then you'll pick the one that makes you the most money and continue the degradation of this country. Prove me wrong.

20. Where did you hear about the State Strategic Plan?:

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Neutral

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Very important
Assist new sustainable energy, resources and infrastructure projects:	Very important
Facilitate investment on Crown land:	Of minor importance
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Not at all important
Support and restore environmental values on Crown land:	Very important
Manage Crown land to build resilience in a changing climate:	Very important
Sustain the places where people come together:	Important
Partner with the organisations that serve our communities:	Neutral
Strengthen and uphold compliance to ensure a fair go:	Neutral
Make Aboriginal land transfers a priority – and see them as an opportunity:	Neutral
Contribute to the ongoing recognition of native title rights:	Important
Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important

Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Neutral
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	It is evident that more people with different passions visit more often Crown Land areas for recreation. The need of dedicated areas to specific use, I am particular interested in mountainbiking, will help the enjoyment, safety and preservation of Crown Land spaces. Dedicated facilities and personel will be needed with potential for job creation for the good of all parties involved.

Standardise leases and licensing for common activities:

Simplify licensing for domestic waterfront structures:

Reduce red tape for government entities managing Crown land:

Provide tools and resources to volunteer Crown land managers:

Build understanding of native title:

Engage and support a new generation of Crown land managers:

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I believe it's important to recognise the importance of Crown land for recreational facilities - particularly low impact ones like mountain bike trail networks. It will allow the community to engage more directly with the land, recognise the importance of keeping it natural, and improve the physical and mental wellbeing of the communities that benefit from its use.

Standardise leases and licensing for common activities: Neutral

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Neutral

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Prioritise the importance of input from the Scientific and Academic communities in respect of Biodiversity and Climate Change.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Crown Land needs to be valued for it's potential future contributions to generations to come, not as a cash cow to dig NSW out of the current Covid hole it finds itself in. Gov't needs to listen to expert scientific and academic advice as to how best proceed to manage Crown Lands with an eye to 50 - 100 years into the future, not just an election cycle or two.

20. Where did you hear about the State Strategic Plan?: Crown Lands website, Other

Other: nsw gov't website

Make Aboriginal land transfers a priority – and see them as an opportunity:

Contribute to the ongoing recognition of native title rights:

Explore co-management of land to generate mutual benefits:

Collaborate with Aboriginal groups in each place to improve outcomes:

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

The use of crown land is actively promoted to maximize cost effective travel within the country concentrating on access through camping, bush walking, paddling and mountain biking. This is not to say that work has already been initiated, however i would suggest it should be a ongoing and maturing priority. This in turn clearly supports economic growth in the surrounding communities. It can attract tourism not just along the 10km coastal fringe but bring it into the less explored regional, rural and remote areas.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

Other:

12. What use/s of Crown land do you value?: Open or green space, Biodiversity, Other

Other: As a land bank for future populations and public land uses. Note: I support community use, renewable energy and Aboriginal use but am concerned primarily about habitat loss.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Protection of biodiversity, habitat and landscape values should be a fifth priority or at least worked into the second one.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Of minor importance

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Of minor importance

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Of minor importance

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Important

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Not at all important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Add: give long term protection to crown land that is substantially covered in native vegetation (for its biodiversity, landscape, climate change and recreation values). Also, any development of crown land should be sustainable and provide public benefit. Aboriginal land transfers should provide for protection of significant environmental values.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Important

Standardise leases and licensing for common activities:	Of minor importance
Simplify licensing for domestic waterfront structures:	Not at all important
Reduce red tape for government entities managing Crown land:	Neutral
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Making it easier to build private waterfront structures privatises public land and blocks public access. I strongly disagree with making this an aim. It should be difficult to get such structures approved and they should be fully assessed.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	The plan says very little about the very important native vegetation, wildlife habitat and landscape values of many areas of crown land, or the fact that vegetation cover is vital for climate change mitigation. This includes native vegetation on TSRs.
20. Where did you hear about the State Strategic Plan?:	Other
Other:	A friend informed me. I have not seen any public notices about it.

Privacy & confidentiality

5. Organisation: [Redacted]
6. Postal/street address: [Redacted]
7. Suburb: [Redacted]
8. State: [Redacted]
9. Postcode: [Redacted]
10. Email: [Redacted]

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Commercial/Economic opportunities translates to private companies using our public land for profit. Looking US, the owners of public lands out. This seriously restricts our rights to use these public lands to recreate responsibly. Private / Economic projects have no rights to our public lands.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Not at all important

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Not at all important

Facilitate investment on Crown land: Neutral

Prioritise the use of Crown land for green and open space in urban areas: Important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Very important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Of minor importance

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Public Lands are not restricted to urban areas. Free up Forest Lands (Public Lands!) for responsible recreation and use for all.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Important

Provide tools and resources to volunteer Crown land managers: Important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Public Lands are for Public Use. Not commercial.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: I find Public Lands is almost a misnomer in Australia now. We have no rights to use our public lands for responsible recreation. Including Forests. Public Lands should not be considered Commercial properties. Should have no restrictions to the public.

20. Where did you hear about the State Strategic Plan?: Social media

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: The desire to engage with community groups that can play an active and educated role in helping to maintain Crown Land for purposes that engage particular interest groups is very important. Thier active participation and engagement can ensure sustainable and environmental concerns are balanced. This will enable our Crown Land to be utilised and enjoyed but done so with care and accountability. In some instances, I believe users would pay (annual subscription or similar) to use that particular Crown Land, if it was well maintained and cared for for use by that specific group.

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	More resources available through funding opportunities. Support network to work with Council's on major projects and issues on Crown Land.

Other feedback

Of the 4 key priorities of the State strategic plan for Crown land, the “expand greenspace, sustainable quality of life and climate change resilience” is perhaps the most challenging for highly urbanised areas such as Woollahra. The Crown land in our LGA provides significant public value, including recreational and health and well-being opportunity. It is in fact used well over the carrying capacity of the land in some cases, to the detriment of its environmental and aesthetic quality. The current COVID-19 pandemic has highlighted the community need for access to open space in urban areas. Urban communities would definitely benefit from more green space; Minister Stokes mentioned that more green space makes for better liveability. Can the plan identify areas that can be acquired to provide more green space in urban areas? An underlying issue is the need for additional resources and support to manage Crown Lands. It would be beneficial for additional funding to be available through an application process and the access to legal advice relating to Crown Land.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Aboriginal land rights, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Of minor importance

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: I don't really understand Strengthen and support evolving community connections as a priority. I would like the 'Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.' priority to be about clean green jobs only.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Important

Expand regional tourism: Neutral

Assist new sustainable energy, resources and infrastructure projects: Neutral

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Of minor importance

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Neutral

Partner with the organisations that serve our communities: Neutral

Strengthen and uphold compliance to ensure a fair go: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Neutral

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: I think they are quite good, however the outcomes under 'Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW' are likely to conflict with some of the others. It should be specific to green jobs creation or Aboriginal jobs creation.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures:	Of minor importance
Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Neutral
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Neutral
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	There are opportunities to have this plan directly correlate with the State TSR Plan and Climate policy as well as Aboriginal affairs. Handing over large parcels of crown land to Aboriginal Land Councils or Groups to restore and rehabilitate for biodiversity purposes has good outcomes for employment, Native Title, Biodiversity and Climate Change.
20. Where did you hear about the State Strategic Plan?:	Crown Lands website

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Very important

Facilitate investment on Crown land: Neutral

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Very important

Strengthen and uphold compliance to ensure a fair go: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures: Of minor importance

Reduce red tape for government entities managing Crown land: Important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Be careful not to free up restrictions so self interested people can manipulate the uses of crown land. It belongs to all of us, and should be used for the benefit of the largest number

20. Where did you hear about the State Strategic Plan?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

DPIE is ripping off buyers of crown road reserves. The valuer-general dermines land value by assessing value of approximately 2ha surrounding the home. Then the VG asks what would reasonable buyer pay for the remaining hectarage. Example a property of 32 ha is valued at \$400,000. Of this 2 ha is 250,000 and 30 ha at 150,000. By deliberate conniving or sheer incompetence DPIE is determining sale price of one hectare of crown road boundary by dividing vg valuation of 400,000 by 32ha for a ha sale price of \$12500 when the vg valus is \$5000 ($\$150000 \div 30\text{ha}$) DPIE is price gauging clients. It is disgusting. It is obscene. It is theft. It must stop.

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

I do not believe there should be any opportunity for profiteering by individuals or businesses from use of Crown Land, however I do think Crown Land is ideal for investing in as host to sustainable, fair, socially contributing business activity (eg renewables, tourism).

Please provide your feedback

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	Very keen to see investment that will encourage community use of Crown land, preferably with only minor works required (anti-erosion, weed control) so that we see more people using the space to get active/exercise, be that by Mountain Biking, by hiking/walking or by other low impact outdoor pursuits. Note that doesn't include destructive/damaging activities such as horse riding or motor cycling - although where suitable land exists perhaps facilities could also be provided for these pursuits in places that won't then detract from the lower impact pursuits of Mountain Biking and Hiking.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I operate a commercial sheep and cattle property in southern NSW alongside my wife. My business has been profitable – we have raised four children, employed locals, generated export income for our community and nation, contributed to a reliable local food chain, regenerated farmland and, as caretakers of the land, taken an environmentally responsible and caring approach to leave the land better than we found it. However, all this is at risk because of a Crown road which passes through my property.

Background The land I farm is fertile, granite soil, open, productive farmland. However, the land to my West and South is light, shale country. It is largely unsuitable for farming so continues to be subdivided and bought up by commuting residents, who access their properties with poorly maintained, private Right of Carriageway roads. As an alternative to this, one of these neighbours is now actively asserting his right to use the Crown road which passes through my property. I hold an Enclosure Permit over this land. Over the last months, I have had considerable loss incurred to my business, unnecessary stress to my animals and myself, and the land has been environmentally vandalised due to the careless actions of unregulated traffic over this Crown road.

- Boundary gates have been left open which introduced a neighbour’s lousy, medullated woolled, unmarked cross bred sheep into my merino flock. My animals had to be treated at great expense to myself.
- Rubble was dumped in a major creek on my property in an attempt to construct a crude, unapproved creek crossing suitable for 4WD vehicles. This occurred at the height of the drought, during summer, and into the only remaining permanent waterhole in the paddock. It left my stock without water in this paddock. This is a rapid rise/rapid fall creek. When the next flood event occurred in this creek, this rubble was washed into other waterholes downstream of this crossing, also ruining them. This was the subject of a complaint to the Natural Resources Access Regulator. However, I was informed that, as this was Crown land, the environmental regulations you would normally expect to be enforced, could not be.
- Internal gates have recently been left open along this road into a newly emerging ryecorn crop. 300 heavily pregnant merino ewes were then able to access this crop and destroy it.
- Vehicles have driven carelessly through lambing ewes causing mis-mothering of lambs and their subsequent death.
- Unidentified vehicles have been driving through paddocks at night, veering from the Crown road onto private land, through crops. I have twice applied to close and purchase these roads. The first time I applied, it took many years to go through the process, only to be denied because of a neighbour who would become landlocked and because the road accessed a

My family negotiated a Right of Carriageway for this neighbour and he withdrew his objection. I also offered an easement to the relevant authority for access to the . Believing I had removed the remaining obstacles for closure and with the encouragement of Crown Lands and NRAR officers, I applied once more. A neighbour, who operates an award-winning innovative business, also applied to close the same road at the same time as it extends through her property and is adversely affecting her business also. However, we have recently learned that, despite a commuting neighbour having an alternate, developed, practical, legal access which he currently uses, Crown Lands have deemed his right to object has outweighed our right to farm our land viably. Discussion The Crown road through my property is a liability to my business. It is illegal for me to deny access to this road, or to lock a gate. Anyone can enter my property, at any time, in any vehicle of any standard, travelling at any speed, with an unlicensed driver of any age. The Crown road does not have to be developed, the land can be eroded, creek habitats can be destroyed, business profitability can be disregarded. My rights as a productive contributor to the economy and my community are not considered at all under the current management of Crown lands. The Biosecurity Act (2016) was adopted to address precisely some of these concerns on private land. Why are we, as farmers, not afforded some of these provisions over the Crown land we are impacted by so detrimentally? The NSW State government has determined the biosecurity threat to farmland and the economy such that it brought in the necessary measures for protection. Yet, Crown land roads passing through such farmland pose an enormous threat. I note that nowhere in the Plan, are farmers' rights as land managers prioritised. There is no inclusion of farmers' biosecurity requirements or rights, or a new approach from Crown lands management in assisting farmers with the measures they require to provide food, fibre and income for our Nation. There is no recognition of the damage that can be done to Crown land through its current unregulated use. Our need for locally produced food and fibre is now increasingly important in a Covid19 world, so our farmers should be given all the protections they need to remain viable and productive. The environmental and safety aspects of the totally unregulated use of Crown land roads needs to be addressed. Presently a user can cause whatever environmental damage they desire – soils eroded, creek banks destabilised, habitats destroyed, water supplies spoilt; without any recourse. We have been witness to this. Where else in our society do we permit this? Currently I am not even permitted to plant a tree on a Crown land corridor to abate erosion. There should be a new fully funded environmental emphasis in managing these Crown land roads. I believe that the balance needs to be restored in giving a priority to food and fibre production over that of a single objector to a road purchase. The management of Crown land roads needs to reflect our new world reality, where biosecurity and environmental protection are fundamental to our ongoing sustainability.

20. Where did you hear about the State Strategic Plan?:

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Jobs and economic growth

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there

any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Important
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Important
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Of minor importance
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Important
Sustain the places where people come together:	Important
Partner with the organisations that serve our communities:	Important
Strengthen and uphold compliance to ensure a fair go:	Important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Neutral
Contribute to the ongoing recognition of native title rights:	Neutral
Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Neutral

Reduce red tape for government entities managing Crown land:	Neutral
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	You mention showgrounds and camping - how about building mountain bike & trail running track networks as well to draw in people. There are often local groups who would be willing to help. There are lots of people who would travel hours to go mountain biking for a weekend or a trail running event.

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Other

Other: Mountain biking for recreation supported by environmentally friendly sustainable track building for health and recreation benefits for families and individuals.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections:	Very important
Work with Aboriginal communities to realise the potential of their land rights:	Neutral
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	There needs to be more off road, in the bush trails for Mtn bike cyclists for mental health and physical well being. This needs to be integrated with the retention of green spaces. Family orientated trails need to be approved and sanctioned such as Westleigh trails similar to Old Man Valley trails sanctioned by Hornsby Council. More are needed in bush land around Sydney. Clubs will do the maintenance in conjunction with council requirement bring economic benefits to the areas approved. Riders spend money as proven in NZ and Tasmania.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Very important
Expand regional tourism:	Very important
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Very important
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Not at all important
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Very important

Contribute to the ongoing recognition of native title rights:	Neutral
Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Neutral
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department	Mountain biking and development of integrated trails in green space for people to enjoy riding in the natural environment on purpose made trails developed in a sustainable framework should be a priority for all Crown land. This promotes use of land for defence of climate change by preserving green

should address in the State Strategic Plan?: whilst engaging people in sustaining the natural environment through Mtn bike club activities in preserving bushland and maintenance of trails.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Neutral

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: There needs to be preservation green space and utilisation of community clubs to preserve and maintain the natural environment. More crown land should be managed jointly by Mtn bike clubs that support sustainable trail building stds. This allows local communities to participate in looking after the natural environment on maintenance days and to participate in land management of green space through a local club.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: The plan needs to include a comprehensive plan for development of single tracks for Mtn biking and bushwalking with a focus on creating green spaces allowing the public riding and walking opportunities. This promotes mental and physical health. It also assists with carbon reduction by maintaining green space.

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Other

Other: Mountain biking and equitable use for all members of the public. There should be access for mountain bikes, walkers, elderly and disable

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Of minor importance

Community land should be about access for all members of the community to enhance quality of life. Especially like to see the expansion of mountain biking trails. Endless walking trails are available. mountain biking is growing and needs more facilities. Commercial general suggests it will be exclusive use: not desired or fair. Maintaining aboriginal heritage is important but land right claims have been sold of to developers in a number of cases for housing developments and this is undesirable fro the community to lose community land.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Neutral

Expand regional tourism: Neutral

Assist new sustainable energy, resources and infrastructure projects: Of minor importance

Facilitate investment on Crown land: Of minor importance

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Neutral

Support and restore environmental values on Crown land: Neutral

Manage Crown land to build resilience in a changing climate: Neutral

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Neutral

Strengthen and uphold compliance to ensure a fair go: Neutral

Make Aboriginal land transfers a priority – and see them as an opportunity: Of minor importance

Contribute to the ongoing recognition of native title rights: Not at all important

Explore co-management of land to generate mutual benefits: Not at all important

Collaborate with Aboriginal groups in each place to improve outcomes: Not at all important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: More free recreational facilities for people like mountain biking, trail running and walking.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Important
Standardise leases and licensing for common activities:	Neutral
Simplify licensing for domestic waterfront structures:	Not at all important
Reduce red tape for government entities managing Crown land:	Neutral
Provide tools and resources to volunteer Crown land managers:	Neutral
Build understanding of native title:	Of minor importance
Engage and support a new generation of Crown land managers:	Neutral
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Crown land should be for the public and public recreation. Simplifying the lease for individuals who owns waterfront structure is a completely off track initiative.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Please provide more areas for public recreation such as mountain biking. Dont give away public land to leases for individuals or organisations that well sell to private

Activity

Name of Activity: State Strategic Plan for Crown Land
 Our Reference:: SSP Crown Land

Please provide your details

1. First name: [Redacted]
 2. Last name: [Redacted]
 3. Do you identify as Aboriginal or Torres Strait Islander?: [Redacted]

4. Are you completing this survey as part of an organisation?: Yes

5. Organisation: [Redacted]
 6. Postal/street address: [Redacted]
 7. Suburb: [Redacted]
 8. State: [Redacted]
 9. Postcode: [Redacted]
 10. Email: [Redacted]

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am a Crown land manager

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: We believe that the priorities are appropriate and aligned with Sustainable Development Goals and New Urban Agenda.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Very important

Assist new sustainable energy, resources and infrastructure projects: Very important

Facilitate investment on Crown land: Very important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Very important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Very important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: We believe that the outcomes noted are consistent with the priorities of the Plan and do not believe that any other outcomes are required.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures: Very important

Reduce red tape for government entities managing Crown land: Very important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: We do not believe that any changes are required in enabling these initiatives. Further details of the initiatives are found in the Plan and will provide feedback below.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

[REDACTED] welcomes the NSW Government Crown Land Strategic Plan and we believe it is a positive approach, providing clarity and direction of management of Crown land into the future. The objective to remove any red tape that prevents councils from making improvements to Crown land that benefit the local community, no doubt will help with our day-to-day management as a Crown Land Manager.

20. Where did you hear about the State Strategic Plan?:

Correspondence from the department

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Jobs and economic growth, Other

Other: I primarily value Crown Land for recreational purposes. I regularly ride mountain bike trails and go for bush walks along these same tracks.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: I believe a large focus should be placed on making Crown Lands accessible to all for recreation purposes and boosting the local economy through tourism by developing high quality mountain bike trails and walking tracks that are legal.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Very important

Assist new sustainable energy, resources and infrastructure projects: Very important

Facilitate investment on Crown land: Very important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Support recreational & social pursuits of the community by developing high quality mountain bike trails and walking tracks.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Very important
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Very important
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Reducing red tape should be moved to number 1 and listed as critically important. The process of having approval to engage in recreational activities on crown land should be streamlined and more should be done to communicate with local recreational clubs & the community.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I would like to see Crown Land being used for high quality mountain bike trails in NSW, but particularly in the Northern Beaches, Sydney, primarily around Oxford Falls & Redhill. This land has been largely unused and with the explosion of this amazing sport in recent years I see it as a perfect opportunity for the Crown Lands to become a leader and with community consultation drive a campaign to deliver high-quality mountain bike trails to the area. This will as we have seen in numerous other locations recently (Derby, TAS & Dungog, NSW to name a couple) bring a massive amount of tourism to the area and be a win win, for the State Government, Crown Lands, local business and the community as a whole. With processes streamlined and communication channels open this largely unused land could become a vital asset in our communities financial & recreational stability.

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: Other

Other:
I pay an annual fee for some crown land on my property, which is virtually unusable or accessible. It has very little use. I am now a widow and we used to run about 20 head of cattle on our entire property, but the crown road/land was not reachable to be used, to the best of my knowledge.

12. What use/s of Crown land do you value?: Other

Other:
Each crown land should be assessed to it's use as some is virtually useless nor accessible, so therefore should not be put in a blanket with all others.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience:	Not at all important
Strengthen and support evolving community connections:	Not at all important
Work with Aboriginal communities to realise the potential of their land rights:	Not at all important
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	Once again each piece of land should be assessed as they all cannot be blanketed as some are useless for anything.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Of minor importance
Expand regional tourism:	Of minor importance
Assist new sustainable energy, resources and infrastructure projects:	Of minor importance
Facilitate investment on Crown land:	
Prioritise the use of Crown land for green and open space in urban areas:	Of minor importance
Use Crown land to expand access to affordable housing:	Not at all important
Support and restore environmental values on Crown land:	Of minor importance
Manage Crown land to build resilience in a changing climate:	Not at all important
Sustain the places where people come together:	Of minor importance
Partner with the organisations that serve our communities:	Not at all important
Strengthen and uphold compliance to ensure a fair go:	Not at all important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Not at all important
Contribute to the ongoing recognition of native title rights:	Not at all important
Explore co-management of land to generate mutual benefits:	Of minor importance
Collaborate with Aboriginal groups in each place to improve outcomes:	Not at all important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	No changes should be made, just leave things as they are!

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Important
Reduce red tape for government entities managing Crown land:	Important
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	No just leave things as they were.
Other feedback	
19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	I think a blanket approach to crown land is not right as there is heaps of land that is not useable for anything and should not be put into the blanket with the likes of waterfront land etc.
20. Where did you hear about the State Strategic Plan?:	Correspondence from the department

Activity

Name of Activity: State Strategic Plan for Crown Land
Our Reference:: SSP Crown Land

Please provide your details

- 1. First name:
- 2. Last name:
- 3. Do you identify as Aboriginal or Torres Strait Islander?:
- 4. Are you completing this survey as part of an organisation?:
- 5. Organisation:
- 6. Postal/street address:
- 7. Suburb:
- 8. State:
- 9. Postcode:
- 10. Email:

No

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?:

I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?:

Open or green space

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.:

Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.:

Important

Expand green space, sustainable quality of life and climate change resilience:

Very important

Strengthen and support evolving community connections:

Of minor importance

Work with Aboriginal communities to realise the potential of their land rights:

Of minor importance

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Important
Expand regional tourism:	Very important
Assist new sustainable energy, resources and infrastructure projects:	Important
Facilitate investment on Crown land:	Neutral
Prioritise the use of Crown land for green and open space in urban areas:	Important
Use Crown land to expand access to affordable housing:	Not at all important
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Important
Sustain the places where people come together:	Important
Partner with the organisations that serve our communities:	Important
Strengthen and uphold compliance to ensure a fair go:	Very important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Of minor importance
Contribute to the ongoing recognition of native title rights:	Of minor importance
Explore co-management of land to generate mutual benefits:	Neutral
Collaborate with Aboriginal groups in each place to improve outcomes:	Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Very important
Simplify licensing for domestic waterfront structures:	Very important
Reduce red tape for government entities managing Crown land:	Important

Provide tools and resources to volunteer Crown land managers:

Important

Build understanding of native title:

Of minor importance

Engage and support a new generation of Crown land managers:

Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Crown Land should be kept open for all Australians to use. Outdoor recreation is an important part of the Australian lifestyle and Crown Land enables a place for this to occur.

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections:

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Any use of land, particularly commercial or housing etc should have stringent environmental assessments done. Any users must adhere to strict environmental outcomes that do not degrade that land and potentially improve that land. Eg Frazier's & pastoralists . Make this a plan for the future, not of the past & employ regenerative practices, not degenerative practices that have been used since white settlement. Provide training & ensure positive land practices.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Very important

Assist new sustainable energy, resources and infrastructure projects: Very important

Facilitate investment on Crown land: Important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Important

Support and restore environmental values on Crown land:

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Neutral

Strengthen and uphold compliance to ensure a fair go:

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights:

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes:

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Indigenous land practices especially around fire management should be sought. Experts & elders consulted, young indigenous people trained. Plans implemented & carried out as was done prior to white settlement to ensure safety in climate change. Access & use non- western indigenous knowledge that avoided major fire events prior to white settlement

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Important
Reduce red tape for government entities managing Crown land:	Important
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Please consider a forward approach to land management that does not emphasis profit over environment for which we are dearly paying. This is an amazing chance to manage land differently to how we have done it for 250 years, to learn from past mistakes that degraded our land & created climate change. The evidence is out there, information around the alternatives are everywhere. Please consult scientists, climatologists & the indigenous to create a better sustainable future focussed approach. Ensure all crown land use adhere to these constraints or else they don't get to use it. That includes any industries, housing, agriculture. It is a resource to cherish not squander. Please.

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: Other

Other: I am an Australian citizen that cares about Australua.

12. What use/s of Crown land do you value?: Open or green space, Aboriginal land rights

Other: In view of the bushfire catastrophes land where ever possible needs to needs to be allocated to the protection of Australian wildlife and also to maintain Aboriginal sites.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Of minor importance

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Once you document commercial opportunities that seems to open up more tape and allowance for the government to go in and start cutting down and destroying more natural bushland.As I have said....land needs to be protected for our wildlife to rebuild and be protected.Indigenous sites also.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Neutral

Expand regional tourism: Neutral

Assist new sustainable energy, resources and infrastructure projects: Neutral

Facilitate investment on Crown land: Of minor importance

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Of minor importance

Support and restore environmental values on Crown land: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Environmental protection.Wildlife protection .Enough wildlife and habitat was post in the fires and needs to be protected.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Of minor importance

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Neutral

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: *I would be excluding the part about loosening the red 5ape. Thats what happens enough and not in a positive way. Also when engaging new crown land managers there should be people assigned that are enviromentalists and that actually care about our wildlife. As well as absolutely Indigenous elders.

Important

Strengthen and support evolving community connections:

Neutral

Work with Aboriginal communities to realise the potential of their land rights:

Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

The land rights cases currently on hold in NSW should be finalised before any other priorities. 37,000 Aboriginal land claims are still waiting on determination.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Neutral
Expand regional tourism:	Neutral
Assist new sustainable energy, resources and infrastructure projects:	Very important
Facilitate investment on Crown land:	Of minor importance
Prioritise the use of Crown land for green and open space in urban areas:	Neutral
Use Crown land to expand access to affordable housing:	Important
Support and restore environmental values on Crown land:	Very important
Manage Crown land to build resilience in a changing climate:	Neutral
Sustain the places where people come together:	Important
Partner with the organisations that serve our communities:	Neutral
Strengthen and uphold compliance to ensure a fair go:	Neutral
Make Aboriginal land transfers a priority – and see them as an opportunity:	Very important
Contribute to the ongoing recognition of native title rights:	Very important
Explore co-management of land to generate mutual benefits:	Neutral
Collaborate with Aboriginal groups in each place to improve outcomes:	Important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Important
Standardise leases and licensing for common activities:	Neutral
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Of minor importance
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

20. Where did you hear about the State Strategic Plan?:

Social media

 7. Suburb:
 8. State:
 9. Postcode:
 10. Email:

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I care about Crown land management as a resident of New South Wales, Other

Other: I live within a wildlife refuge in [Redacted]. Our property here has crown land on two sides which given this is a wildlife refuge means that the use of the land adjacent to it is of major interest. It would be a concern if the land was misused. I believe Crown Land should be protected for our flora and fauna and left so the public can enjoy it and our biodiversity is protected.

12. What use/s of Crown land do you value?: Open or green space, Aboriginal land rights, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections:	Neutral
Work with Aboriginal communities to realise the potential of their land rights:	Very important
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	Protect the land for biodiversity to prosper. Keep forests intact for climate change challenges - ie: don't make the situation worse by cutting down trees. Where application allow indigenous groups to use the land / claim the land if from country connected to that land.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:	Neutral
---	---------

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Not at all important
Expand regional tourism:	Of minor importance
Assist new sustainable energy, resources and infrastructure projects:	Neutral
Facilitate investment on Crown land:	Not at all important
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Not at all important
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Important
Sustain the places where people come together:	Neutral
Partner with the organisations that serve our communities:	Not at all important
Strengthen and uphold compliance to ensure a fair go:	Neutral
Make Aboriginal land transfers a priority – and see them as an opportunity:	Very important
Contribute to the ongoing recognition of native title rights:	Very important
Explore co-management of land to generate mutual benefits:	Neutral
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	Where I have chosen 'neutral' it's because the statement is too vague and questionable. Leaves the situation open to exploitation. The only focus should be to sustain forests and green spaces, and do this in consultation with First Australians and environmental bodies who are sole purpose is to better the country in preparation for climate change and maintain existing forests and green spaces.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.:	Strongly disagree
---	-------------------

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Neutral
Simplify licensing for domestic waterfront structures:	Not at all important
Reduce red tape for government entities managing Crown land:	Neutral
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Neutral
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Again. Where I've written 'neutral' the question is too vague and open to exploitation.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: I think it is good you are reaching out for input - however - I don't believe it is completely in good faith regarding public consultation. Many people would find the questions too open for interpretation in differing directions.

85% of Crown Land lies in the Western Division, but the priorities and outcomes appear to be largely framed on the 15% to the east, where the voters live. While the strategic plan offers the outcomes of support for innovative and sustainable regional industries, environmental restoration and building resilience to climate change which are highly relevant to the region, there is no indication that the somewhat specific needs of the Western Division have been factored in to these considerations. The plan has little mention of the Western Division other than in a descriptive context and certainly not in relation to initiatives. The Western Division has complex problems including ongoing decline in landscape condition, the ecological condition of region's rangelands arguably amongst the worst in

Australia. The regional pastoral industry is straining with issues such as climate variability, depopulation, excessive total grazing pressure largely due to unmanaged herbivores and potentially long-term liabilities associated with inappropriate carbon projects. However, models of more resilient pastoral management are evolving and there is potential for regenerative management based on a carbon economy. Given a chance, the region could be the biodiversity hub of NSW. There is no shortage of strategic measures that could be adopted by Crown Lands, the Western Division administrator.

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Vital to emphasise community access and sustaining and improving biodiversity

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I am very concerned when I see statements like supporting commercial opportunities on Crown Land. This sounds like allocating public land for privileged individual use and profiteering. This is not to say that one should 'lock up' Crown Land but it is to say that the Crown Land must be managed in such a way as to improve community and native fauna use of the land sustainably for future generations. Surely there is sufficient privately owned land in regional centres which is available for innovative businesses to establish and thrive, including with Government financial and other assistance. It is unnecessary to provide precious public land for such purposes. The result would be a further degradation of biodiversity and the sacrifice of precious natural assets for relatively short term gain. This cannot happen. Jobs for regional centres are vital but existing private assets and government support structures should be deployed for this activity.

12. What use/s of Crown land do you value?: Aboriginal land rights

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are Under the Aboriginal Land Rights Act 1983 (NSW) the NSW Crown Land estate is the only category of land available (and even then, in circumscribed ways) for Aboriginal peoples to lay claim to land and to be

there any new priorities, you would like to suggest?:

transferred title. The Crown Land estate is already shrinking. In 1983, the ALRA was conceived as a mechanism of compensation for Aboriginal communities in recognition of past government actions of disenfranchisement and was considered a quick mechanism to grant large tracts of claimable crown parcels back to communities through Local Aboriginal Land Councils. Tragically, this promise has failed to be realised. Land Claims take on average up to 10 or more years to process. It can take another 5 years for title to be transferred. In the case of land claims being refused, several in our case have been won upon appeal. The process itself has been adversarial and litigious. Meanwhile, generations of Aboriginal people within the LALC boundaries have not been able to experience the socio-economic benefits accruing to them as their human rights. The Draft State Strategic Plan needs more than to just "work with Aboriginal communities to realise the potential of their land rights." The Draft Strategic Plan needs to prioritise the assessment of land claims in general, and to do so in ways favourable to Aboriginal people. All of the other objectives stated in the Plan, such as 'enabling jobs growth', 'strengthening community connections', and 'expanding green space' cannot advance without Aboriginal land rights being placed front and centre. Our LALC has hundreds of undetermined claims within our jurisdiction. Other stakeholders may have interests in 'enabling jobs growth' and 'expanding green spaces' on those very same parcels of crown land, but they fail to realise that while the land is under an active Aboriginal Land Claim, any local trustee of that land is breaching the inchoate interests of the claimant Aboriginal Land Council. This injustice fails to provide for the land rights that our Aboriginal ancestors fought to win.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

- Support innovative and sustainable regional industries: Important
- Expand regional tourism: Important
- Assist new sustainable energy, resources and infrastructure projects: Of minor importance
- Facilitate investment on Crown land: Of minor importance
- Prioritise the use of Crown land for green and open space in urban areas: Important
- Use Crown land to expand access to affordable housing: Important

- Strengthen and uphold compliance to ensure a fair go: Of minor importance

Make Aboriginal land transfers a priority – and see them as an opportunity:	Very important
Contribute to the ongoing recognition of native title rights:	Important
Explore co-management of land to generate mutual benefits:	Very important
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	The co-management of crown lands to generate mutual benefit ought to be seen within the framework of enabling the realisation of Aboriginal land rights. All of the initiatives stated above -- regional tourism, investment on crown land, infrastructure, and environmentalism to name a few -- should be initiatives negotiated in conjunction with the relevant Aboriginal Land Councils, which are statutory bodies corporate constituted to provide exactly those benefits to their Members and their wider communities. The systemic injustices born of colonialism and racism that have affected Aboriginal peoples in NSW will not be resolved without such commitments at all levels.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Of minor importance
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Of minor importance
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	These initiatives do not speak to the singular importance of Local Aboriginal Land Councils in their obligations to provide socio-economic, cultural and spiritual benefit to their members through freehold title of claimable crown lands. Certainly information needs to be more available and transparent - Land Councils need to know which parcels are claimable, the status of undetermined claims, and the prospects of appeal. Too often Land Councils pay to have lawyers or consultants assess this information which should fall to the Minister. If leases and licensing for common activities are standardised, this could risk overlooking the particularities of the ALRA. Reducing red tape for government entities managing crown land could also risk Land Councils being railroaded where they have an active claim by the trustee 'managing' the local parcels of crown land if the Land Council has them under claim, by giving the perception of a green light to build infrastructure without consulting the LALC. The understanding of native title is only one component. Far more numerous are the undetermined land claims submitted through the ALRA; the understanding

of the ALRA and the statutory role of Local Aboriginal Land Councils needs to be understood, and partnerships negotiated where possible.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

The Draft State Strategic Plan is vague and non-committal regarding Aboriginal land rights. Pages 22-23 contain no targets or KPIs. The information provided also whitewashes the problem of the volume of undetermined land claims (which are in the tens of thousands) instead choosing to highlight the 13,000 that have been granted across the state in the past 40 years. The Plan does nothing to note the ways in which Native Title and Aboriginal Land Rights legislation are unfortunately made to compete with each other. The Plan should honour Aboriginal people by setting hard targets for the resolution of land claims in a timely manner. The Plan should also stipulate principles of co-management or a framework for Local Aboriginal Land Councils to work with Local Government Councils to achieve positive ends for the whole community. Crown land managers should set targets for climate management and environmental conservation and Aboriginal land management through the provision of Aboriginal Rangers. Instead of the Plan's initiatives competing in order of importance, we ought to see them as co-existing and working together.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

PROTECTING THE NATURAL ENVIRONMENT AND THE ANIMALS AND PLANTS WITHIN IS THE MOST IMPORTANT THING. Stop selling land to developers/mining and knocking down natural habits of animals. Growth in community's can come from sustainable energy NOT more coal mines and housing developments. DO NOT FRACK. ALL AUSTRALIAN LAND SHOULD REMAIN AUSTRALIAN OWNED. FOREIGN INVESTMENT SHOULD ONLY BE ALLOWED TO LEASE LAND and the MUST PAY APPROPRIATE TAXES . River management should benefit animals, plant and community water supply. DO NOT give permits to water hungry crops in drought prone areas. We need to protect nature as this is our most valuable asset. Increase animal control programs to eradicate foxes, feral cats and wild dogs who kill native species. Use crown land for breeding programs of native species.

- Expand regional tourism: Very important
- Assist new sustainable energy, resources and infrastructure projects: Very important
- Facilitate investment on Crown land: Not at all important
- Prioritise the use of Crown land for green and open space in urban areas: Neutral
- Use Crown land to expand access to affordable housing: Not at all important
- Support and restore environmental values on Crown land: Very important
- Manage Crown land to build resilience in a changing climate: Very important
- Sustain the places where people come together: Important
- Partner with the organisations that serve our communities: Neutral
- Strengthen and uphold compliance to ensure a fair go: Very important
- Make Aboriginal land transfers a priority – and see them as an opportunity: Neutral
- Contribute to the ongoing recognition of native title rights: Important
- Explore co-management of land to generate mutual benefits: Important
- Collaborate with Aboriginal groups in each place to improve outcomes: Important
- Do you believe that any changes should be made to these outcomes or would you like to suggest any other: PROTECTING THE NATURAL ENVIRONMENT AND THE NATIVE ANIMALS AND PLANTS WITHIN IS THE MOST IMPORTANT FUNCTION OF CROWN LAND. STOP KNOCKING IT DOWN. TOURISM TO REGIONAL AUSTRALIA IS BECAUSE

outcomes the department should address in the State Strategic Plan?: OF ITS BEAUTY NOT ANOTHER HOUSING DEVELOPMENT OR MINE. HUMANS HAVE ENOUGH SPACE. LEAVE THE REST TO THE ANIMALS.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Neutral

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Independent review of any decisions that require clearing of natural habits that destroys homes for animals and plants. Any politician or person found getting kick back for allowing licenses, permits or land clearing should be jailed and fined. STOP MINING. Allow aboriginal heritage sites to remain untouched.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: It is important that any feedback on social media by the public is considered. I feel like a large number of people have commented on social media re the crown land strategic plan but probably won't take the time to fill this form in. Their feedback MUST be considered as well.

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I think it is critically important that the Crown Land Strategic Plan addresses the issue we have in the state of NSW with access and support for Mountain Biking trails and facilities. Currently, there are almost no council facilities or National Parks facilities in the greater Sydney Region. Beyond that, there are not many facilities that are able to exist at all. Crown lands have an incredible opportunity to open up their lands to a more COVID-safe and unstructured sport that encourages outdoor learning, exercise and time in the bush. More support and less red tape for mountain bike projects, as well as support for existing unsanctioned trail networks on Crown Land.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I strongly support the recognition of rock climbing as a valid recreational activity on crown land. Futhermore I generally believe in the importance of the recreational value of crown land. Accessible, free recreation is a vital avenue for appreciating the value of our public land, our bush and biodiversity, and strengthens local communities. I believe it is an important avenue to facilitate the outcomes of the plan.

Explore co-management of land to generate mutual benefits:	Very important
Collaborate with Aboriginal groups in each place to improve outcomes:	Very important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	Housing on Crown land is inconsistent with reserve purpose, NT and ALC ; Housing benefits individuals and this is inconsistent with objects and principles. It essentially will tie up crown land and not all will be able to to have enjoyment and use of the land.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Neutral
Standardise leases and licensing for common activities:	Not at all important

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Neutral

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: leases and licences are standardised. If you mean make it look like other government agencies then no because the CLMA is different to other acts. If you mean to send the Crown land staff to work for Service NSW - that won't work either - CL is complicated and complex . Work cannot be undertaken by Service NSW . Crown lands is not like the residential tenancy act . the main issue with CL is that it is under resourced and understaffed. Want better turnarounds times in processing of licences? Stop the unofficial freeze on filling job vacancies. Fill positions and let staff do their work. Want administration o be simpler? Repeal the CLMA and go back to the the 1989 act - it is basically the same as the CLMA but less complex for Councils

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Principles and Objects - totally missing from the State strategic plan - it is the first part of the CLMA and it noticeably absent. Housing and Crown lands don't mix - please advise what new reserve purpose you are going to add to facilitate this ? Going to sell the land to developers for housing ? Crwon lands is finite resource,once its leased, sold or developed that it - there is no more. Use freehold land not Crown land for development. Keep the land for future generations for environmental and public recreation

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Zero development other than restoration and recreation on crown land! Caveats that if it's returned to Aboriginal use they too are not able to on-sell nor develop it... EVER. If they have no use for it - then it's to return to Crown title.

Please provide your feedback

Explore co-management of land to generate mutual benefits:	Important
Collaborate with Aboriginal groups in each place to improve outcomes:	Neutral
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	add a caveat that any Crown land returned to native title NOT be allowed to be sold nor developed. if they don't want it - then it's to return to Crown Title.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Very important

Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Neutral
Build understanding of native title:	Neutral
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	define the boundaries of Crown land/private land in situations like Wamberal Beach erosion. Resume endangered houses and forbid building in the same area.
Other feedback	
19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	Work with local Councils and define the boundaries of Crown land/private land in situations like Wamberal Beach erosion. Resume endangered houses and forbid building in the same area.
20. Where did you hear about the State Strategic Plan?:	Social media

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Jobs and economic growth, Renewable energy, Other

Other: Recreational use such as mountain biking

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

There are a number of existing mountain bike trails on crown land in the northern beaches area of Sydney. These spaces should be preserved and formalised as designated trails for the mountain bike and bush-walking community to use and enjoy for generations to come. I would love to see a formal body working with local mountain bike clubs to further design, develop and maintain these trails, whilst showing ultimate care and respect for the surrounding bushland.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Important

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Neutral

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Of minor importance

Support and restore environmental values on Crown land: Important

Manage Crown land to build resilience in a changing climate: Important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Very important

Strengthen and uphold compliance to ensure a fair go: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Neutral

Contribute to the ongoing recognition of native title rights: Neutral

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Consider the existing use of crown land as far as mountain bike and walking trails are concerned, and preserve these for future generations to enjoy

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Important
Standardise leases and licensing for common activities:	Very important
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Important
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Ensure engagement is completed where crown land is currently utilised by bush walkers and mountain bike riders to enable to preservation of the existing trails in the northern beaches area.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Mountain biking popularity has increased dramatically over the past 10-15 years and found new heights during covid-19 as one of the few recreational/fitness activities that was permitted under strict social distancing rules. This is evidenced by the huge number of riders using local trails on crown land each weekday and even more so on weekends. It's vital to the mountain biking community that there are safe and formalised trails to ride in the Northern Beaches area. Manly Dam and the surrounding trails are great, however they are not sufficient to cope with the volume of participants of the sport, and also don't provide a level of difficulty befitting the skill levels of many of the riders in the local area.

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Greater involvement of experts in biodiversity and native animal habitat regeneration.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Neutral

Standardise leases and licensing for common activities: Neutral

Simplify licensing for domestic waterfront structures:	Not at all important
Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Neutral
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Neutral
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Have to question why you would not suggest "Make ALL of our information available and transparent". So, I cannot help but be suspicious of the motives with the whole 'Strategic Plan'.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

At a time of a global pandemic, with climate change upon us, I can't help but questions the motives for changing the Crown Land's changes to planning. It has the appearance of making changes to use the Crown Land as a resource for commercial development. With so many of native wildlife species threatened, better to plan to restore habitat and biodiversity before it is too late. It is our human species that is also dependant of healthy environment .

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Jobs and economic growth, Other

Other:

Outdoor recreational use, both motorised and non motorised. Also the right to camp on Crown Land. I support traditional Aboriginal use of land, but not exclusive access. Indigenous and non Indigenous peoples can have a connection to the land we all share.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: The number one priority should be to make crown land accessible for all Australians for a variety of uses. It's public land that should be kept in public hands for public use.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Important

Expand regional tourism: Very important

Provide tools and resources to volunteer Crown land managers: Important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: The proposition for the reduction of Red Tape makes me nervous. Does that mean that entities managing crown land can force closures without proper community consultation.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: For a large country with a relatively small population, Australia is seriously lacking in terms of the amount of public land that can be used for mixed recreational activities. We have an opportunity to manage crown land in such a way that there are benefits for a wide range of people, from tourism operators to motorcycle riders, from traditional custodians of the land to new Australian's that just want somewhere to take their kids for a walk. Please prioritise public access to as much publically owned land as practical.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	I would like to see off road cycling - mountain biking/gravel bikes/bikepacking - advanced as specific issues in the plan to build business/opportunity and tourism. There are many great examples of the positive impact (economic, environmental, sustainable) mountain biking and mountain bike trails have on our communities from Derby in Tasmania to Dungog in NSW and I would like to see NSW really embrace these opportunities and build some world class facilities.

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Not at all important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Aboriginals in wild nomadic tribal times did not see land as something that is owned. It's just only good if there's food in a certain area and fight with other tribes happened over it. They use to believe that no one owns the land, it owns us. The Colonial British Empire brought the idea of land ownership.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Should be for locals and people that use or like to use the crown land not people of a certain race or racial groups like Aboriginal. That's racial discrimination. Besides no one lives in a nomadic wild tribe anymore. If one is interested in Aboriginal tribal life it comes under anthropology and should be available to any one regardless of race, religion, sexual orientation, occupation etcetera.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Very important
Reduce red tape for government entities managing Crown land:	Neutral
Provide tools and resources to volunteer Crown land managers:	Neutral
Build understanding of native title:	Not at all important
Engage and support a new generation of Crown land managers:	Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: At beaches and waterways an extra warning sign or added to new warning signs reminding of possible sharks and marine stingers in the area.

11. Which of the following options best indicates your current or past use of Crown land in New South Wales?: I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, Other

Other: I am adjacent to NPWS Nature reserve [Redacted] with a frontage to a crown river and crown road on my boundary and hold an enclosure permit over the access road. We were denied the purchase of the crown roads because of objections by NSW Fisheries.

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Other

Other: I believe that as part of biodiversity that some land needs to be protected from the public for study purposes

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Of minor importance

Strengthen and support evolving community connections:	Very important
Work with Aboriginal communities to realise the potential of their land rights:	Of minor importance
Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:	Disagree with wind and solar farms being forced on communities. Disagree with climate change resilience being included with green space. There is enough renewables in the pipeline. Dislike wording of land rights and potential but agree with aboriginal access and maximising understanding of the aboriginal experience. Claims on developed land should not be allowed. When're sustainability is mentioned my mind goes to climate change "issues. It is possible to value the environment without being a climate change believer or alarmist. These values don't reflect mine. I support job creation but not from inappropriately cited wind and solar farms.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Neutral
Expand regional tourism:	Very important
Assist new sustainable energy, resources and infrastructure projects:	Not at all important
Facilitate investment on Crown land:	Of minor importance
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Of minor importance
Support and restore environmental values on Crown land:	Of minor importance
Manage Crown land to build resilience in a changing climate:	Not at all important
Sustain the places where people come together:	Very important
Partner with the organisations that serve our communities:	Very important
Strengthen and uphold compliance to ensure a fair go:	Neutral
Make Aboriginal land transfers a priority – and see them as an opportunity:	Of minor importance
Contribute to the ongoing recognition of native title rights:	Of minor importance
Explore co-management of land to generate mutual benefits:	Of minor importance
Collaborate with Aboriginal groups in each place to improve outcomes:	Neutral
Do you believe that any changes should be made to these outcomes or would you like to suggest any other	Rural and regional areas need supporting but renewable projects are divisive. If there is any objection then they should not proceed. Cities need more green space. Lane Cove in Sydney is amazing! Make account accommodation cheap. I agree with more land for aboriginal culture

outcomes the department should address in the State Strategic Plan?:

education but not native title claims over development. Too many land councils implode so maybe land should be gifted for a time The reassessed.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.:

Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:

Very important

Standardise leases and licensing for common activities:

Important

Simplify licensing for domestic waterfront structures:

Very important

Reduce red tape for government entities managing Crown land:

Important

Provide tools and resources to volunteer Crown land managers:

Very important

Build understanding of native title:

Very important

Engage and support a new generation of Crown land managers:

Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Include in the "information" the. Serious connections between government departments, legislation and lines of authority. " new generation " is ambiguous. What does that even mean?

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

I could have given better comments if each subsection was numbered. I would like to see clarity on crown roads and ownership when roads are not built on exact locations. This is a big issue in regional areas where paper roads are placed on steep land where a road is not possible so a road was built elsewhere. Who owns that road? What are insurance implications? Fisheries Dept should not be able to block an otherwise permissible purchase of a Crown road. A creek bed that is owned by a landowner should not suddenly be regarded as pseudo crown land when a fisherman wants to walk up it to go fishing. Fishermen have too much power in this regard. Rural landowners are being held hostage by NSW Dept of Fisheries who block the purchase of crown roads just for the "right" to fish. So fishing rights should be restricted when they impact landowners. Their right to fish should not override my right to peace and safety while using my own land. The rights of lessees to object to development should be respected especially for renewable projects. Some crown land is expensive to enter or stay over night; pls reduce these costs.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?:

I am an Aboriginal Land claimant over areas of Crown land, I am a Native title claimant over areas of Crown land, I use Crown land for recreation, I care about Crown land management as a resident of New South Wales, Other

Other:

I have been involved with two (2) Native Title Claims with my People over the Traditional area of my Ancestors. Both claims were successful and accepted in regard to us passing the National Native Title Tribunal Registration Test for us to become Registered Native Title Claimants. The first claim was after a period of time withdrawn, as this was in relation to a Future Act. The second claim was withdrawn after several years but the State Government of NSW through the Crown Solicitors Office of NSW who were representing their client the NSW State Government admitted that we are the right people for the area claimed and of which subsequently we have this admission in writing from the Crown Solicitors Office of NSW but we were asked to withdraw the claim so that discussions could proceed! Therefore, we passed both Registration Tests and have confirmation from the second claim from the NSW State Government we are the right people for the claimed area. So although we do not have a Native Title decision and are not Registered Native Title Claimants at this present time, we still hold the paperwork from the NSW Crown Solicitor office stating that their Client (NSW State Government) agree we are the direct descendants of the Traditional Aboriginal People of the claimed area. So, YES, myself and my People still hold Native Title rights over OUR Traditional Country and the NSW State Government, although not proceeding through the court has admitted to this in the documents we are in possession of! So the Crown Land in OUR Traditional Country is of huge importance to myself and my

People and we have a right and legacy left to US by our Ancestors to look after and care for OUR Traditional Country just as our Ancestors did! It's the right of Traditional Owners to care for what has been part of them for thousands of years not the right of some Local Aboriginal Land Council that happens to be made up of people who have NO Traditional connection to OUR Traditional Country!

12. What use/s of Crown land do you value?:

Aboriginal land rights

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.:

Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.:

Important

Expand green space, sustainable quality of life and climate change resilience:

Important

Strengthen and support evolving community connections:

Important

Work with Aboriginal communities to realise the potential of their land rights:

Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Yes, I believe that seeing that it was and still is Aboriginal Land (the colonial British Government and current Australian Government have never paid for this land and they do not have a deed of sale or title to this country from the Original Inhabitants but it was stolen from us!) Even your own document for this Strategy states in section 2.1 'How Crown Land Came To Be' that it was taken away from our People and sold off ! Below is a reminder of what is in the first paragraph on page 16 of the Strategy Prior to European settlement, all of what is now NSW was Aboriginal land. As part of establishing a new colony the government of Great Britain asserted legal ownership of all land. From this base the colonial, and then the state government proceeded to allocate or sell land, and to record and guarantee its ownership. You say in Section 2.3 that 'We recognise that Australia's First Peoples need access to Crown land in order to exercise their native title rights and also more broadly to care for Country and undertake cultural practices.' Well instead of giving it to Local Aboriginal Land Councils, give it back to the People you originally stole it from the Traditional Owners of those areas! Just because those People might not have a Native Title determination or be Native Title Claimants, it doesn't mean they are not the right People! Like OUR People we can prove it and have confirmation from the NSW State Government that we are the right People so why would you go and negotiate with a Local Aboriginal Land Council in OUR Traditional Country and give them land but not negotiate with us so that we can get some of OUR Peoples Traditional Country back! Is it because if it goes to a Land Council it is made into Freehold Land and Native Title is then extinguished (and still in Government ownership through the government run Land Council) thus making it impossible for OUR People to ever claim it back? It just opens the door for the Government to get more Freehold and a way to stop Traditional Owners

from getting THEIR land back! The Government says that they have made a way for Aboriginal People to get Native Title here in NSW but they don't tell anyone how impossible it is to get a successful determination because of the hundreds of thousands of dollars and years of heartache it takes to even start down that road and then to be kicked in the guts at the end anyway! So, YES, I do believe that changes should be made to these priorities and the new priorities I suggest is to give OUR Traditional Country back to the right People instead of giving it away to everyone else!!

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

- Support innovative and sustainable regional industries: Important
- Expand regional tourism: Very important
- Assist new sustainable energy, resources and infrastructure projects: Important
- Facilitate investment on Crown land: Neutral
- Prioritise the use of Crown land for green and open space in urban areas: Important
- Use Crown land to expand access to affordable housing: Not at all important

- Explore co-management of land to generate mutual benefits: Very important
- Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Once Again I say that your priority is dealing with the Traditional Owners of the various areas of Crown Land management and not just talking about Local Aboriginal Land Councils. You should be taking notice of what your document actually says in Section 2.3 2.3 'Aboriginal people have legal rights regarding land' where it states 'We recognise that Australia's First Peoples need access to Crown land in order to exercise their native title rights and also more broadly to care for Country and undertake cultural practices. Removing barriers to access is of great importance to them and

the wider community.' At least give us as Traditional Owners a chance have them involved in the co management!

Open or green space, Community use, Aboriginal land rights, Biodiversity

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.:
14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Neutral

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.:
Expand green space, sustainable quality of life and climate change resilience:

Neutral

Very important

Strengthen and support evolving community connections:

Very important

Work with Aboriginal communities to realise the potential of their land rights:

Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW seems to be a clear conflict with Expand green space, sustainable quality of life and climate change resilience, especially when a local council is the crown land manger and interested in creating revenue from reserves via a small number of paying customers more than ensuring the intrinsic value of open space to the wider community is appropriately valued.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Important

Expand regional tourism:

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Neutral

Prioritise the use of Crown land for green and open space in urban areas:

Use Crown land to expand access to affordable housing: Neutral

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Explore co-management of land to generate mutual benefits: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Again there are a number of conflicts within the priorities group and the outcomes group. Who decides which is to take precedence from Expand regional tourism vs Prioritise the use of Crown land for green and open space in urban areas, a local council crown reserve manager or the community in which the reserve sits?

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities:	Very important
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

How do you strongly disagree with Reduce red tape for government entities managing Crown land, I do not feel that this is not at all important, I feel councils need to be taken to task when there is a conflict between revenue generation and community needs and the council has the resources to navigate legislation to drive outcomes seemingly unavailable to community groups interested in preserving open spaces in urban and other areas. Even when the community has provided a clear mandate on what they would like to see in their community, and council supports initially this only to overturn it with no consultation. Communities are enfranchised and disillusioned with the way councils treat communities now, removing accountability from councils via relaxing requirements on them to consider the value of open space to communities is not a positive step

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	I believe that parcels of crown land, in communities with a population of fewer than 10,000, should be set aside for social housing and aged care facilities. Currently many aging rural dwellers are forced to relocate to distant centres if they require aged care. They should not have to move away from the district with which they are familiar. Cities and larger towns should retain crown land as green areas for the recreation and enjoyment of the people.

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Crown is owned by residents of Australia and should be of use to citizens. Crown land should not be granted or given away to corporations, individuals or companies for gain or profit. The Original occupiers of Terra Australis should have a say in how this Crown land is managed to stop destruction of historical ancient sites.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Not at all important

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Not at all important

Facilitate investment on Crown land: Not at all important

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures:	Not at all important
Reduce red tape for government entities managing Crown land:	Not at all important
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	End excessively long term and transfer of leases to individuals or companies who will gain financial advantage from Crown land.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	Companies, individuals and lease holders of Crown lands have had an advantage, financial gain and received long term benefits from lease with unfair length of leases without much outlay. This is unfair to citizens of NSW.

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Yes, In keeping with the principle that "Crown Land is held in trust by the NSW Government on behalf of the community" I submit that where appropriate such lands should be open to hunting for the purposes of food gathering and conservation. This would also be of significant economic benefit to regional communities, and therefore well aligned with the stated objectives of the draft plan.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:	Very important

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
---	----------------

Standardise leases and licensing for common activities:	Very important
Simplify licensing for domestic waterfront structures:	Neutral
Reduce red tape for government entities managing Crown land:	Important
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Neutral
Engage and support a new generation of Crown land managers:	Important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Prioritise community engagement by codifying a requirement for consultation with current, stakeholder groups. And implement a formal process, and standing committee for submissions from potential stakeholders to be assessed.

Other feedback

As previously stated, I strongly support NSW Crown lands to be re-opened to licensed hunters under the NSW Public Land Hunting Program. Licensed hunting provides many benefits to the NSW community, economy and primary industries. In a 2019 DPI report, hunting generated an estimated \$1.6 billion for the NSW economy, however opportunities are limited for licensed hunters. Safe, legal and responsible hunting occurred on several crown lands that were declared and open to licensed hunters in the past. It was a very successful program that allowed responsible and ethical hunters to help landholders and managers control pest species and contribute to the management of community spaces. Licensed hunters have been permitted to hunt in NSW State forests since 2006 and has occurred safely alongside forestry operations and the many other recreational users of the land. Licenced hunters must be adequately trained, seek permission through the correct channels before hunting and carry a GPS enabled device at all times on currently declared public land. The DPI public land hunting program has successfully delivered, conservation and economic benefits for the whole NSW community at minimal cost to government. There is no reason this program could not be expanded to cover appropriate areas of Crown Land.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

crown land is an important resource for community recreation. unstructured adventure sports such as trail running and mountain biking are experiencing a rapid take-up and sustainable trail infrastructure to support these activities can really assist regional communities to attract visitors and grow new sources of revenue to support these ailing communities. more community. crown land in urban areas is also under-utilised for recreation, sporting clubs should be able to lease land for recreation use such as active sports such as, walking, running and mtb biking

20. Where did you hear about the State Strategic Plan?:

Social media

Other:

formalisation of the many existing trails on crown land would allow clubs, volunteers to legitimately maintain these trails!

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Very important

Simplify licensing for domestic waterfront structures: Neutral

Reduce red tape for government entities managing Crown land: Very important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Improvement of the consistency and timeliness of lease formalisation for commercial leasing of facilities on Crown land. As a Land manager who has commercial tenants providing commercial returns on Crown land, the slow return of lease documents is embarrassing. We are in a position where the commercial lease assists with the maintenance of heritage buildings and supports the community access to the Reserve, through "The Lock-Up". One tenant is a multi-national organisation who works effectively with the Land Managers, but we need to be able to provide surety of tenure through a lease in a commercial timeframe so that both parties are fully cognisant of the agreement and its terms as agreed, signed, and returned.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

The release of the draft State Strategic Plan is a great step in recognition of the importance of Crown Lands. Following this is the need to continue to support the Land Managers (3.2(2)) with a detailed understanding of how Crown Lands will assist in the maintenance of established Assets, such as the buildings and other facilities, that are located on this land. The State Strategic Plan does not recognise these Assets as a Priority or Outcome in their own right.

20. Where did you hear about the State Strategic Plan?:

Crown Lands website

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I am involved with a community or volunteer group that uses or maintains Crown land facilities, I use Crown land for recreation, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Other

Other:

Riding my mountain bicycle in a natural environment. Community involvement in land management and trail building. Walking my dogs off leash or on leash in a natural environment. Cycling along singletrack trails in the bush with my dog. Managing my mental health due to engagement with nature Keeping physically fit and maintaining my offroad cycling skills Social rides in the bush with my family or with friends and club members. Encountering horse riders and other walkers/cyclists in the bush. Being aware of illegal activities such as dumping, tree felling and alerting my community and authorities regrading this.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience:

Important

Strengthen and support evolving community connections:

Very important

Work with Aboriginal communities to realise the potential of their land rights:

Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Yes, existing networks of trails in National Parks and in reserves/Crownlands are outdated and in an appalling state. In spite of mountain bicycling being the biggest land-based outdoor recreation in the world today, Sydney maintains its reputation as the anti-cycling capital of the world, since there are NO sanctioned, long distance networks of graded, public trails for offroad cyclists to engage with the outdoors and link green spaces together. Walking is indulged above all else, as is building concrete cycle paths- when 75% of all bicycles sold in Australia are mountain bicycles- designed to ride in the dirt, through the bush!!! Currently, cyclists are forced to do tedious 'laps' around exiting tiny networks, (ie OMV, Westleigh) because there is nowhere else to ride- this situation playing nicely into the hands of all those who, in their ignorance, point the finger and accuse offroad cycling of severe impacts re: noise, erosion, flora and fauna. Actually, the fault lies squarely on their watch. They are the cause of illegal trail building and environmental impacts because of their elitist policies of exclusion, instead of inclusion. For a perfect example, look no further than the shocking events at Oxford Falls etc in the NIMBY - centric Northern Beaches. And even the tiny existing 'official' mtb trails networks in Greater Sydney (ie Wylde) are not permanent and therefore constantly under threat of being closed. It is like having just one or two fields for all Sydney rugby and football players to train and play on- which may or may not be secure for any future use. There is limited understanding amongst many NSW Land management authorities (& consultants, designers, experts etc) in general- regarding the mtb lifestyle and global recreation of offroad cycling, the range of distances a bicycle can efficiently and sustainably cover, nor of the care taken by professional trail builders, like ██████████ to integrate the design and flow of the (OMV) trails WITH the environment. What are the benefits to trees and the wider environment of dirt singletrack trails development? Why are the experts not studying this? Why is there always such a slant toward negative, narrow-minded, cynical bias and the presumption that all human interaction with the environment is bad for it- presenting and looking for 'scientific evidence' to confirm that bias? A more balanced view re: positive and negative outcomes is needed to inspire further trust and confidence in all future developments. Gather and share scientific research and evidence regarding benefits to the environment and communities of building extensive public mtb trail networks like Derby, Rotorua etc and their positive influence on the entire local regional economy. It is an abrogation of the duty and responsibility of NSW state to ensure and facilitate sustainable quality of life outcomes for its visitors, citizens and taxpayers by marginalising a huge recreational group, who love assisting with trail builds & maintenance (ie: the Soil Search movement) and engaging with the outdoors- namely mountain bikers. My overarching impression of how things are at the moment is that it is far easier to have thousands of hectares of vast, empty, inaccessible 'protected' national parks & reserves- making yourself the all-powerful, sole custodian of it all. Future implications for NSW State and the Sydney metropolitan area

include extraordinary fuel build-up and associated fire danger, little societal interest in outdoor activity or conservation, obesity epidemic, mental and physical health burdens on the medical system, flatlining or decreasing property values, major youth disengagement, and the flight of intellectual capital and skilled workers to destinations where they are both appreciated and offered a better lifestyle.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

- Support innovative and sustainable regional industries: Very important
- Expand regional tourism: Very important
- Assist new sustainable energy, resources and infrastructure projects: Of minor importance
- Facilitate investment on Crown land: Important
- Prioritise the use of Crown land for green and open space in urban areas: Important
- Use Crown land to expand access to affordable housing: Neutral
- Support and restore environmental values on Crown land: Of minor importance
- Manage Crown land to build resilience in a changing climate: Not at all important
- Sustain the places where people come together: Important
- Partner with the organisations that serve our communities: Very important
- Strengthen and uphold compliance to ensure a fair go: Neutral
- Make Aboriginal land transfers a priority – and see them as an opportunity: Of minor importance
- Contribute to the ongoing recognition of native title rights: Neutral
- Explore co-management of land to generate mutual benefits: Very important
- Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Involve traditional owners re: imparting fire skills, land management. Exchange of interests between groups. Involve local youth re: building and maintaining singletrack trails networks. Build pump and jump tracks for our youth (ie Terrey Hills) Not everyone wants to play a sport/recreation with a ball in it!! Create allies amongst recreational bush user groups: ie horse riders, dog walkers, hikers and offroad cyclists Land hand overs like those to MLALC at Oxford Falls and Cascades areas have been conducted in an exceptionally poor manner- causing fear, mistrust and division within local communities- while further reducing available green space - therefore putting more pressure onto bushlands that the local community has available.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures: Very important

Reduce red tape for government entities managing Crown land: Very important

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Provide maps of Crown Lands. It is impossible to find any. When I go out walking and exploring I dont want to be stressed out thinking 'am I trespassing" Also, the state needs to audit certain landowners: there are many who put up illegal 'private property' 'no camping' etc signs, selfishly denying outdoor citizens access to public roads, servitudes- tracks, firetrails and even waterways and beaches. ie: Webbs Creek Road, Forsters Swimming Hole in Galston, Mooney Mooney Creek and many more.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

RECLAIM FIRETRAILS, SERVITUDES, BEACHES AND CREEKS FOR COMMUNITY ACCESS. There seems to be an alarming and selfish tendency for a handful of land and property owners to claim servitudes, creeks, firetrails, and even entire beaches and inlets for themselves. They put up nasty little signs and are rude and aggressive toward the outdoors community 'trespassing' on 'their' land. Council and State authorities need to do an audit of this behaviour and make sure that private property and recreational bushland boundaries are clear, that bushland maps (and reporting of landowner-related incidents) are readily available for the public to access and refer to for proper navigation, that servitudes, reserves & roads remain open for community access, as well as natural features along waterways and waterways themselves. Toxic, arrogant landowners who are overreaching and illegally barring land access and/or claiming collective natural etc features for themselves must be held accountable for their actions by authorities. The Sydney area is intersected by deep creeks- so geographically, we are divided. This must NOT be further reinforced by poor development planning or private property owners illegally landlocking entire areas and preventing the right to link and appreciate such areas on foot, horse, bicycle or boat via local roads, trails, servitudes and waterways. ACTIVE TRANSPORT & TRAFFIC CONGESTION: The age of the car is dead. The daily commute is an utter nightmare- no matter how safe, upmarket or 'environmental' your car is. Congestion levels all to inCARceration. Future proof by changing commuter behaviours and facilitating that change. Campaign for the purchase of E-Bikes to commute in to work, or use as bridging transport could be subsidised by NSW state govt. as part of their Climate Change etc policies. Pernicious NSW cycling 'road safety' regulations and draconian demerit fines must be disallowed, as they obstruct cycling and have made the fun, healthy activity of bicycling into a political act in NSW. Safe cycle paths to green grids, and dirt singletrack

mountainbike trails networks linking natural environments must be built throughout Sydney. PUMP TRACKS & EASY/SKILLS PROGRESSION TRAILS/AREAS Not everyone wants to do a sport that has a ball in it. Build a bicycle pump tracks for local kids and adults to practise their skills and have fun riding together. (Research: TERRY HILLS pumtrack- meteorically popular with anyone from age 3-63!) Include a short, skills progression track circuit in nearby bush/parks to explore and appreciate the bush. These easier, short trails could also be disabled-friendly. RECREATIONAL & SCENIC FEATURES EQUESTRIAN/WALKING & CYCLE CIRCUIT: Build 20km+ gravel path circuits-creating a series of multi-user horse riding, walking, wheelchair, and cycling circuits all around and linking green grids for tourists, equestrians, elderly, families, novice riders & the disabled. Take in scenic & heritage city features, have information boards & maps, rest stops/regrouping areas at selected places. Build safe pedestrian/bicycle crossings across busy roads. MOUNTAIN BIKING TRAILS NETWORK & BUSHLAND LINKS Imagine there were zero facilities for thousands of soccer and rugby players in Sydney? Or there were a handful of illegal footie facilities, but they could be randomly closed by police 'crackdowns' at any time... Well, Greater Sydney has NO offroad cycle trails networks for sanctioned offroad cycling, apart from Hornsby Council's amazing, but confined OMV 'bike park' network. 5 or 10km is not really a 'mountain bike trail.' Cycling along tedious, steep gradient firetrails for miles is not 'mountain biking,' either. A bicycle can cover huge distances very efficiently in a short time. Factor E-Bikes into the mix and you can ride it even faster. Sanctioned, navigable DIRT singletrack networks of 50-200km are what is urgently needed here. Mountain biking is the biggest land-based outdoor recreation (and sport) in the world and there are thousands of offroad cyclists in Sydney who officially have nowhere to ride their bicycles far away from, and off the stressful, over-surveiled, petty regulated traffic sewer roads of Sydney- yet tens of thousands of hectares of bushland (Crown, National Parks, Recreation Reserves, Sports grounds, Catchment/creek areas) remain mostly empty, or inaccessible, unappreciated and under-utilised, because access to them for bicycling has been denied or is neither facilitated or encouraged. This incredibly frustrating situation is the root cause of unsanctioned trails being built and ridden, putting people in danger, causing unnecessary conflicts and, worst of all- damage to the bush. It also represents a major missed opportunity for job creation, tourism, addressing youth obesity & mental health, employment opportunities, contribution to local regional economies, community lifestyle improvement, better property prices due to close proximity to good trails, RFS perhaps being able to better fight fires due to better foot access to remote areas along trail network singletracks.

13. These are the best priorities for Crown land over the next 10 years.: Strongly disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Of minor importance

Strengthen and support evolving community connections: Not at all important

Work with Aboriginal communities to realise the potential of their land rights: Not at all important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

New priority. You should be allowing more free campgrounds that don't associate with NPWS. The freedom of self sufficient camping is being taken away and it is essentially robbing us of our hobby. We don't want to pay a \$6 booking fee to camp next to four other families. We want to utilise land and camp in the middle of nowhere sustainably.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Other:

12. What use/s of Crown land do you value?
Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy
Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Strongly agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

All elements detailed above are very important & with intelligent planning all can be successfully incorporated into any project done on crown land. Ecological restoration, linking of isolated ecosystems and remedial work on degraded land and riparian corridors can provide work for locals, engage with the community (Indigenous, farmers, scouts, Landcare,). It will not only provide employment, involve indigenous Australians & local communities, and provide open spaces for outdoor activities, it can also reverse biodiversity loss, mitigate climate change, restore soils (including sequester carbon) and help recharge water tables, and help in hazard reduction in natural vegetation. These projects can also be incorporated into climate mitigation policy which will help Australian meet our Paris agreement targets. A recent Pew report indicated a \$4-billion investment into a national conservation and land management program could raise economic output by about \$5.7 billion, reduce welfare costs by \$620 million and generate 53,000 jobs over the next four years. 70 organisations including, Environmental organisations, the National Farmers Federation, NSW Farmers, AgForce and Landcare organisations from across the country all support this proposal. Crown land could play an integral part in this investment. <https://www.farmonline.com.au/story/6885885/support-growing-for-an-environmental-job-stimulus-package/> NB: NFF policy is to be carbon net neutral by 2050. Restoring soils to sequester carbon through restoring native grassland protecting biodiversity on Crown land can contribute greatly too this outcome. <https://www.abc.net.au/news/2020-08-20/farmers-back-zero-emissions/12576806> Protection and restoration of ecosystems on crown land can also be used as biodiversity offsets under the NSW Biodiversity Conservation Act 2016. This will protect biodiversity & help finance the upkeep of crown land & reduce the cost to the taxpayer. Renewable energy projects can also be included on crown land which will provide employment for regional people, an income stream for farmers and communities and provide cost effective energy to the community and businesses

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please see previous comments. I'd also like to add that processing and recognising Indigenous Land claims should be a priority prior to any projects being planned for crown land. Partnerships with such organisations as Indigenous Representatives, Caring for Country, Regional & City Councils, Australian Wildlife Conservancy, RFS , Landcare, YWCA, local communities, business associations and farmer representatives should be made a priority when considering use of Crown Land in a region. In urban areas crown land should be protected for use as wildlife corridors, decontamination of runoff through wetland systems, riparian zone protection and open spaces for outdoor activities. In urban areas crown land should be prioritised for use as green corridors to reduce heat island effect, allow movement of native plants, birds and animals & provide open space and areas that support the building of a sense of community.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation
Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Biodiversity, Renewable energy
Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Neutral

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Stop the growth of big cities and erosion of nature

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Strongly disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Important

Expand regional tourism: Not at all important

Assist new sustainable energy, resources and infrastructure projects: Very important

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Important

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Of minor importance

Strengthen and uphold compliance to ensure a fair go: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Neutral

Contribute to the ongoing recognition of native title rights: Neutral

Explore co-management of land to generate mutual benefits: Of minor importance

Collaborate with Aboriginal groups in each place to improve outcomes: Of minor importance

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: Halt current levels of migration allowing the cities to stop encroaching on the natural environment

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Of minor importance

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Neutral

Build understanding of native title: Of minor importance

Engage and support a new generation of Crown land managers: Neutral

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Privatisation of Crown land should not be allowed anywhere !

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Crown land should be seen as belonging to ALL Australians and not be developed by privatisation which benefits part of the population only.

Other: Fishing, hunting, foraging, and camping

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Encouraging recreation of all types should be a priority. Attracting tourism can help rural economies. Turning NSW public land into an asset will not only encourage its preservation its will help diversify the state's income. Best practices from places like New Zealand and the USA can be observed on how to best manage communal land to avoid "tragedy of the commons" scenarios. As Attenborough once put it "No one will protect what they don't care about; and no one will care about what they have never experienced".

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Very important

Expand regional tourism: Very important

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Neutral

Support and restore environmental values on Crown land: Important

Manage Crown land to build resilience in a changing climate: Important

Sustain the places where people come together: Important

Partner with the organisations that serve our communities: Important

Strengthen and uphold compliance to ensure a fair go: Important

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

I agree that strengthening and upholding compliance is important and can help to ensure that there is fair use of a public resource, however too many rules and regs become very expensive, time consuming and confusing for the end user and push people to not comply at all. It would be worth looking at a way that all these licences can be rolled into one card (e.g. like in the construction industry) and one payment scheme with one payment date and possible discounts on more licences and longer time periods. In regards to energy, resource and infrastructure projects; This will be hard to quantify the impacts, benefits and "renewability" of potentially proposed projects and what projects will qualify and what wont. Is logging a forest in strips renewable because it promotes quick

regrowth? Is logging an entire forest renewable because it will grow back in 50 years? Is oil fracking renewable because in a few ice ages there will be new deposits? I see benefit in this outcome however there I believe there will need to be well structured criteria that will see minimal impact to Crown Land and actual benefit to emerging/innovative industries that cannot gain this benefit elsewhere. I don't believe that public housing should be in this consideration. There are many other avenues that would make better fiscal sense and create a better long term outcome to fix the housing issues in australia.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

Please provide your feedback

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I use Crown land when travelling away from home or visiting other places, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Aboriginal land rights, Biodiversity

Other:

Genuine healthy habitat for wildlife. Not big cleared areas with manicured grass, or grazing lands, but genuinely biodiverse areas rich with life for future generations.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Of minor importance

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Expanding green space with the management and input of traditional owners is, in my view, paramount. Imagine if some crown lands became thriving, biodiverse habitats for wildlife. Imagine the flowing grassy plains and towering old growth trees filled with marsupials and bird life, all sustained by indigenous cultural burning practices. Imagine the employment for Indigenous people, as they give tours and guided bushwalks through crown lands, connecting locals and tourists to the landscape around them. Now is the time. Eco living and eco tourism is the way of 2020 and beyond. From bushfires and climate change to Australia having the highest rate of mammal extinction in the world; now is the time. You have the unique chance to stand on the right side of history, and create vibrant living spaces for future generations. With precise management from Indigenous people, crown lands can be both productive and ecologically sustaining. Society being harmonious with the bush is inevitable- it is the only way we will survive into the future. Let's not wait any longer. The future of crown land in NSW is bright- and it's full of green, biodiverse potential.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Of minor importance

Expand regional tourism: Neutral

Assist new sustainable energy, resources and infrastructure projects: Of minor importance

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Not at all important

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Very important

Sustain the places where people come together: Of minor importance

Partner with the organisations that serve our communities: Of minor importance

Strengthen and uphold compliance to ensure a fair go: Of minor importance

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Neutral

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: The future is green and biodiverse. Indigenous land management created the Australia we know and love, and sustained it for 60,000+ years. There is so much potential for transforming crown lands into biodiverse native habitats managed by Aboriginal people. No more developments. Harmonious, productive, biodiverse societies are the way forward.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Disagree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Neutral

Standardise leases and licensing for common activities: Of minor importance

Simplify licensing for domestic waterfront structures: Not at all important

Reduce red tape for government entities managing Crown land: Not at all important

Provide tools and resources to volunteer Crown land managers: Neutral

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?: Red tape? As in green tape? Crown land is vitally important for its environmental values. Of all of these options, native title is certainly the most synonymous and important. Not investment, any colour of tape, or development.

- Explore co-management of land to generate mutual benefits: Neutral
- Collaborate with Aboriginal groups in each place to improve outcomes: Neutral

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

I feel strongly that there is an opportunity to use these wonderful green spaces to strengthen community bonds and appreciation of nature by creating sustainable trail networks that highlight the natural beauty so us and our kids can realise that the world is a wonderful thing if you go out and embrace it. This would also make for much improved mental health outcomes for the whole community. These trails need to be for both cyclist and walkers, some multi use, and others specific to use. This would make particular sense in the Oxford Falls and Belrose areas where there are emerging trail networks that could be much better managed with a strong volunteer community willing and able to be actively involved.

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Include Commercial ventures such as Hotel accommodation in Crown Land National Parks to boost tourism to the National Parks, most overseas countries have tourism infrastructure such as Hotels in National Parks which in Australia come under Crown Lands. We live on the Hawkesbury River at [REDACTED] and tourism in the area has always been held back because of lack of accommodation with no hotels in the area. The reason is that we are in a national park region with only small river towns available for domestic housing. Peat Island is a prime example of an opportunity for the NSW State Government to look at addressing the lack of tourism accommodation in the region by considering the island's potential as a hotel site with tourism infrastructure for locals and visitors alike with a huge tourism potential of extending tourism nights in the Sydney regional area. The Hawkesbury River is on Sydney's door step and it's potential is huge yet without accommodation for tourism in the area, the potential is lost to other regions away from Sydney and interstate.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: Other

Other: [Redacted] was formed in the Crown Land Area of Precinct one of Bellinger Heads State Park.

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy, Other

Other: Leased areas of the BHSP like Caravan Parks should be providing the Funds and contributing to local community.

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Funding for any of these works needs to be in place before anything is handed over. The prime Leaseholds and sites have been taken away from community and should be providing support. Note Reflections Caravan Park at North Beach Mylestom. Which is not contributing to local community and was run by Mylestom Trust.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Neutral

Expand regional tourism: Important

Assist new sustainable energy, resources and infrastructure projects: Very important

Facilitate investment on Crown land: Neutral

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Neutral

Support and restore environmental values on Crown land: Very important

Manage Crown land to build resilience in a changing climate: Important

Sustain the places where people come together: Very important

Partner with the organisations that serve our communities: Very important

Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Very important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: As always the funding is what is important, if Funds to run anything are not in place before handover then everything collapses or is not maintained. Crown Land which is leased and that funding from a locality should be utilised locally and be the first part. But that will not be enough to support the land and the work/maintenance which is necessary. Seems like handing something over and walking away by Crown Land is current proposal.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Neutral

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:	Very important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	
Reduce red tape for government entities managing Crown land:	Very important
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Very important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	Community Consultation and not a one size fits all setup. If the changes are not suitable for a particular community then everyone loses interest and the Land and facilities fall into disrepair.
Other feedback	
19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	It is just a statement of intent with no actual concrete funding Dollars amount allocated to each parcel of Land and what will be put in place to ensure future funding. Seems totally like getting rid of what is a hassle and is costing funds.
20. Where did you hear about the State Strategic Plan?:	Social media, Crown Lands website

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Aboriginal land rights, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Not at all important

Expand green space, sustainable quality of life and climate change resilience: Important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Important

Do you believe that any changes should be made to these priorities, or are there I would like to see more value placed on Crown Land to be managed for its conservation habitat values as many threatened species (both flora and fauna)use them as a refuge from development, agriculture and industry. It

any new priorities, you would like to suggest?:

is valuable as corridors and these should be protected, managed for weeds and expanded.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:

Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Of minor importance

Expand regional tourism:

Of minor importance

Assist new sustainable energy, resources and infrastructure projects:

Facilitate investment on Crown land:

Not at all important

Prioritise the use of Crown land for green and open space in urban areas:

Important

Use Crown land to expand access to affordable housing:

Of minor importance

Support and restore environmental values on Crown land:

Very important

Manage Crown land to build resilience in a changing climate:

Very important

Sustain the places where people come together:

Important

Partner with the organisations that serve our communities:

Strengthen and uphold compliance to ensure a fair go:

Very important

Make Aboriginal land transfers a priority – and see them as an opportunity:

Important

Contribute to the ongoing recognition of native title rights:

Important

Explore co-management of land to generate mutual benefits:

Important

Collaborate with Aboriginal groups in each place to improve outcomes:

Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

Please provide your feedback

17. These are the best enablers to support delivery of the plan.:

Agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent:

Very important

Standardise leases and licensing for common activities:

Important

Simplify licensing for domestic waterfront structures:

Neutral

Reduce red tape for government entities managing Crown land: Of minor importance

Provide tools and resources to volunteer Crown land managers: Very important

Build understanding of native title: Important

Engage and support a new generation of Crown land managers: Important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: Very concerned that with 34% of the State managed as Crown Land with little recognition of its environmental value quite apart from their offset value but could be added to National Parks estate and protected into the future especially when surrounded by Park or next too Conservation Lands. We have travelling stock routes around our area with koala, Rufous Bettong and other endangered species of both plants and animals. These should be managed and preserved as both a refuge and corridors and linkages for fauna to move and disperse across the landscape.

20. Where did you hear about the State Strategic Plan?: Social media, Google search

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	As a land owner adjacent to [REDACTED] [REDACTED] I value the benefit of our gate access to the community garden. I am an active volunteer in the garden and use this gate access to assist with removal of dumped rubbish and unwanted furniture dumped there, but way of removing items and organizing council pick ups. This mutual arrangement will not be possible if the access is blocked on the centre side. We also provide neighborhood watch by being able to check any suspicious noises or activity by popping through the gate.

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.:

Of minor importance

Expand green space, sustainable quality of life and climate change resilience:

Very important

Strengthen and support evolving community connections:

Very important

Work with Aboriginal communities to realise the potential of their land rights:

Important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Important

Expand regional tourism:

Very important

Assist new sustainable energy, resources and infrastructure projects:

Neutral

Facilitate investment on Crown land:	Important
Prioritise the use of Crown land for green and open space in urban areas:	Very important
Use Crown land to expand access to affordable housing:	Of minor importance
Support and restore environmental values on Crown land:	Important
Manage Crown land to build resilience in a changing climate:	Important
Sustain the places where people come together:	Very important
Partner with the organisations that serve our communities:	Important
Strengthen and uphold compliance to ensure a fair go:	Important
Make Aboriginal land transfers a priority – and see them as an opportunity:	Important
Contribute to the ongoing recognition of native title rights:	Important
Explore co-management of land to generate mutual benefits:	Neutral
Collaborate with Aboriginal groups in each place to improve outcomes:	Important
Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:	
Please provide your feedback	
17. These are the best enablers to support delivery of the plan.:	Agree
18. Please rate each of the enablers from 'Very important' to 'Not at all important'.	
Make more of our information available and transparent:	Important
Standardise leases and licensing for common activities:	Important
Simplify licensing for domestic waterfront structures:	Important
Reduce red tape for government entities managing Crown land:	Very important
Provide tools and resources to volunteer Crown land managers:	Very important
Build understanding of native title:	Important
Engage and support a new generation of Crown land managers:	Very important
Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:	
Other feedback	
19. Please provide any other comments about the draft State Strategic Plan for Crown land.:	
20. Where did you hear about the State Strategic Plan?:	Social media, Crown Lands website, Correspondence from the department

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Jobs and economic growth, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Very important

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights:

Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

I believe all of these Issues are equally important and think there is an opportunity to collaborate on community projects that preserve these spaces and also bring economical opportunity to the surrounding areas. For example during the past few years and particularly the covid pandemic there has been a push towards outdoor activities like hiking and mountain biking, and this can be seen in many suppliers of equipment running out of stock, especially in the cycling industry, both hiking and mountain biking need minimal infrastructure but do demand larger portions of land to keep diversity in the trail networks, most networks can and are maintained by local volunteers and is actually a large part of the culture around these sports, with participants preferring to create community volunteer groups to maintain their local trails rather than relying on local governments to perform maintenance. This philosophy of participants of these sports taking care of their trail networks creates a profound sense of pride and care for these areas and gives the community a personal connection to these spaces, where rather than expecting a paid worker to clean up problems they will happily make the effort to remove rubbish, clear storm debris or even fix erosion issues to keep trails networks open for their trail using community to safely enjoy. This in turn lowers running costs for local governments, creates greater financial opportunity for local suppliers of equipment for these sports in the area and also many others like cafe's, restaurants, accomodation service stations etc. for what are relatively low environmental impact and low economical cost sports they both have a high impact in creating opportunity for all of the aforementioned points in the draft plan for crown land.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.:

Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries:

Very important

Expand regional tourism:

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.: As a volunteer in the Sutherland Shire Bushcare program specifically working on the maintenance and development of the Mill Creek Mountain Bike Trails, I believe that there is a opportunity in this area to expand to facility in a way that will not only benefit the sport and the riders in the area but the local community and businesses through increased visitations from out of area riders, also there is currently a possibility to involve the local aboriginal community and the land managers in a project the respects the land and its traditional owners and gives and opportunity to preserve, protect and also showcase the area In a way that future generations can appreciate the history of the area but also enjoy and access the area while raising awareness of or indigenous people and their culture. Due to government and landowners mismanagement this opportunity has no way to come to fruition with very little way of making contact and systems around that and it is a similar story across the country with a lot of these spaces that are wanted by groups to like hikers, mountain bikers, campers , fisherman, motorcyclists and 4 wheel drivers to take care of, enjoy and

preserve end up being sold as land for industrial or housing developments when the community has neither the infrastructure nor the need for more housing or industry. Please make the effort to make a way for community groups to contact and make connections with government and land managers more simply and do away with the naive view that outdoor activities like the aforementioned activities are not worth further investment in our communities, most are low impact on the environment and finances but do contribute greatly to local revenue, for example say your local soccer player spends maybe \$750 on game specific equipment a season in local business while a local cyclist will spend upwards of \$5000 when buying a new bicycle, \$200 on a helmet and \$150 on shoes, thats just to get into the sport, mountain bike fracks do not need mowing, line marking, daily watering during the playing season, on the other hand volunteer trail maintenance is part of the culture of mountain biking, yet most councils do not have a cycling path let alone a trail network. If it is time to get real About sustainable use of land in this country maybe having 5 soccer fields in a suburb is not the best option?

20. Where did you hear about the State Strategic Plan?:

Social media, Crown Lands website, Other

Other:

My local trail maintenance team informed me of this also

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Important

Expand green space, sustainable quality of life and climate change resilience: Neutral

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Of minor importance

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?: Promote outdoor activity and appreciation of natural surroundings through mountain bike recreation. This provides health and wellbeing to participants through exercise in beautiful natural surroundings. Many towns and regional locations have already benefited economically from the introduction of Mountain Bike Trail Networks. This model should be applied everywhere, including within The Greater Sydney Area

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Neutral

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

- Support innovative and sustainable regional industries: Important

- Collaborate with Aboriginal groups in each place to improve outcomes: Neutral

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?: from what I have witnessed in the GSA, particularly the Northern Beaches - MLAC is transferred crown land then they get the bushland rezoned and developed for housing. That is BS and not how the limited remaining bushland in Sydney should be treated. Crown Land should be accessible by everyone and used for recreation. A mountain bike trail network is a great example, minimal impact on nature yet allows people to access areas they would otherwise never see while having fun and receiving the benefits of exercise and mental wellbeing. I understand that sites of cultural significance and history should be preserved and I support that, but cutting

down bushland in a housing development cash grab does little in building my interest in Native Title rights.

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

Enough of bushland is "locked up" in National Parks, government departments, councils and alike, yet even these land managers are developing and implementing Mountain Bike Strategies. Where is the Crown Land Mountain Bike Strategy, guiding crown land managers to implement Mountain Bike Trail Networks? Until this occurs, unformalised trails will continue to be built, often poorly as communities all over NSW do the best they can to provide riding solutions as Crown Land managers do little if anything to support this growing activity.

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Aboriginal land rights, Biodiversity, Renewable energy

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Disagree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

If, as a community, we are to face the very real and inevitable climate change catastrophe that is quickly emerging we have to ensure that Crown land usage is always kept in the hands of the people of New South Wales and should any government want to change the usage it must go to a Referendum ensuring that all people have a voice in how it is used. Crown land should never be sold or leased to developers or overseas interests. Crown land must always remain a natural and important part of our state's ecosystems and not overly developed or destroyed.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

Support innovative and sustainable regional industries: Of minor importance

Expand regional tourism: Of minor importance

Assist new sustainable energy, resources and infrastructure projects: Important

Facilitate investment on Crown land: Not at all important

Prioritise the use of Crown land for green and open space in urban areas: Very important

Use Crown land to expand access to affordable housing: Neutral

Support and restore environmental values on Crown land: Very important

11. Which of the following options best indicates your current or past use or interest in Crown land in New South Wales?: I use Crown land for recreation, I care about Crown land management as a resident of New South Wales

Other:

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity

Other:

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Agree

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Neutral

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Very important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

The Plan needs to follow the priority order stated in the Crown Lands Management Act (2016) to 'require environmental, social, cultural heritage and economic considerations ... in decision-making ...' The plan is predominantly economic with the precious environmental values largely neglected; not true to the emphasis in the Act. The Act's principles state in the first instance (a) ... the natural resources... be conserved wherever possible; (e) ...should be used and managed in such a way that both the land and its resources are sustained in perpetuity. This determines a responsibility to future generations so they have options, and therefore a responsibility for Crown Lands management should be contributing to sustaining the endemic diversity of all NSW's plants and animals and associated cultural and social benefits for future generations. That is being conservative in allocating land to other uses in the present. Can the Strategy define a duty of the current generation to permit diverse nature to survive to benefit future generations? Natural resources, ecosystem services and biodiversity integrity underpin 'sustainable and prosperous communities', by enabling resilience and adaptation to climate change, microclimates, provision of water, soil fertility, carbon fixing, among many other benefits. The vision should be revised to: "Crown land supports resilient nature and sustainable prosperous communities," (since sustainable communities, would by definition, be resilient). Particularly in the context of NSW having an increase in land clearing on private property, it is particularly important that a priority is to "Manage Crown land to build resilience (of nature) in a changing climate" and factor in international initiatives to ensure 30% of land area is protected for biodiversity. The NSW Government has to be prepared to provide resources to care for our Crown lands commons, as this contributes to the quality of life for all; saving through prevention.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Agree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

- Support innovative and sustainable regional industries: Neutral
- Expand regional tourism:
- Assist new sustainable energy, resources and infrastructure projects: Important
- Facilitate investment on Crown land: Neutral
- Prioritise the use of Crown land for green and open space in urban areas: Important
- Use Crown land to expand access to affordable housing: Neutral
- Support and restore environmental values on Crown land: Very important
- Manage Crown land to build resilience in a changing climate: Very important
- Sustain the places where people come together: Important
- Partner with the organisations that serve our communities: Important
- Strengthen and uphold compliance to ensure a fair go: Very important

Make Aboriginal land transfers a priority – and see them as an opportunity: Very important

Contribute to the ongoing recognition of native title rights: Very important

Explore co-management of land to generate mutual benefits: Very important

Collaborate with Aboriginal groups in each place to improve outcomes: Important

Do you believe that any changes should be made to these outcomes or would you like to suggest any other outcomes the department should address in the State Strategic Plan?:

The recognition of the importance of green space to human well-being and health is positive; as is equity of access. The emphasis on 'open space' seems to deny the health and well-being benefits of the experience of being in quality (diverse) nature. Providing increased access to green space, should not mean the preferred option is that natural areas are landscaped, mowed, and planted with limited species. Nature has value, and we need to overcome the enthusiasm for the idea 'For they carved a public golf course, From a valley full of scrub' (Lane Cove Country Club). Outcomes under green space have affordable housing ... which seems to be at odds to green spaces, as housing is destructive of nature and not relevant to this priority. An outcome that increases green space and retains biodiversity around affordable housing could improve quality of life for lower socio-economic groups. The Strategy states there will be continuing releases of land for housing and infrastructure, increasing urbanisation, with land typically bulldozed, with a total decimation of local biodiversity. This means every year the natural areas are reduced, for urban development. Can the Strategy define a limit on how small the residual natural area will be, or does the reduction continue decade after decade, until there is no nature? The Extinction Crisis in Australian Cities and Towns, (ACF, 2020) notes that around 25% of Australia's nationally listed threatened plants and 46% of threatened animals are found in cities, towns and suburbs, and for 39 threatened species, these urban areas are the last remaining places where they exist. The report states: 'cities are incredibly important for biodiversity, and that habitat is being destroyed at a rapid rate of knots'. Sydney tops the list with 80 of the most threatened species. The Gold Coast-Tweed Heads region and the NSW Central Coast were next at 39 for both regions. Therefore, an explicit role for Crown Lands to contribute to biodiversity conservation around urban areas is imperative.

Please provide your feedback

17. These are the best enablers to support delivery of the plan.: Strongly agree

18. Please rate each of the enablers from 'Very important' to 'Not at all important'.

Make more of our information available and transparent: Very important

Standardise leases and licensing for common activities: Important

Simplify licensing for domestic waterfront structures: Of minor importance

Reduce red tape for government entities managing Crown land: Neutral

Provide tools and resources to volunteer Crown land managers:

Build understanding of native title: Very important

Engage and support a new generation of Crown land managers:

Very important

Do you believe that any changes should be made to these enabling initiatives, or are there any other enabling initiatives you would like to suggest?:

Identify the key public benefits of the Crown Land Estate and ensure effective community engagement in decisions. To enable nature to function and adapt to climate change impacts, Crown Lands should be a part of wildlife corridors consistent with Aus Gov National Wildlife Corridor Plan (DEE, 2012) “.. link up areas of habitat, ... support natural processes ... movement of species to find resources, such as food and water.” This enables resilience of nature. The option to “look for opportunities to work with the responsible government agencies... to manage Crown land” is an option. However, this can have unintended consequences when expertise/ principles are not aligned. Decisions on Travelling Stock Route (TSR), e.g. by Local Land Services to place large tracts of the network under long term permit; threaten loss of these benefits. Management of TSR should retain this unique, continental scale corridor of publicly owned remnant vegetation with great environmental, economic, cultural (both Aboriginal and European) and social benefits to NSW. TSR retain threatened species and Endangered Ecological Communities that are either poorly represented in the protected area network, or in some bioregions entirely absent. As well as providing vegetated remnants TSR play an essential role in maintaining connectivity of habitats at the landscape scale. Transparency about the assessment of the value of these areas for biodiversity and cultural values needs to be made public and underpin decisions and action. The NPWS should be the agency of choice to manage TSRs as a complement to protected areas. Following the drought, regeneration of these areas is imperative without grazing. Making information available is important. Especially transparency in decision making on changes in management and to leases on Crown Land. It seems, that those ‘in the know’ are privileged, increasing inequity and compromising ‘the commons’ for all. Consider an engagement strategy so people are more aware of what land is in common trust and the decisions made about it. Guide, build capacity to develop governance structures that enable community associations (and Land Councils) to manage crown land; particularly on the nature/ green space/ biodiversity component, where it is not appropriate to engage NPWS. Engaging the community in caring for their country/ place strengthens community networks and resilience; uses local knowledge, develops attachment to place and can contribute to reconciliation with first Australians.

Other feedback

19. Please provide any other comments about the draft State Strategic Plan for Crown land.:

The responsibilities for Crown Land under two Ministers with different agendas seems to be a set up for potential conflict and especially for protection of the environment under the Act. Western Lands make up most of the Crown Land. There is no strategy mentioned to manage these lands to increase resilience to climate change. Limit land clearing, reducing grazing pressure, adopting regenerative agriculture, increasing biodiversity and rewilding should become principles for western lands. Where land is mis-used and degraded, leases should be cancelled. It would be positive to see how the Barkandji could manage their country (and have associated water rights). However, provide government resources and learn lessons from managing their way. Boats and moorings: Surely, there is a limit on the mooring of boats in bays throughout the state? It is hard to see a bay in a natural state in Sydney without boats parked in the "commons". The strategy should deal with this burgeoning and unsustainable use of waterways, associated boat cleaning with the public more involved in making decisions about ‘boat parking’. Land for biomass – energy

production. The impact of this use of crown land in the strategy needs careful thinking about in terms of consequences. The State Forests are not mentioned in the plan and the management of these (particularly non plantation forests) must embody an important biodiversity conservation and connectivity role. It is clear nature holds within it many benefits, with the biodiversity allowing an understanding of evolutionary mechanisms that could lead to new medical treatments or scientific breakthroughs. The clear felling of virgin native forests destroys such possibilities, and will be condemned by future generations. Can the Strategy make a clear statement that land clearing must stop? There is a real concern that the environmental and social values of Crown Lands are marginalized with economic concerns being paramount.

11. Which of the following options best indicates your current or past use of Crown land for recreation, or interest in Crown land in New South Wales as a resident of New South Wales, or as a New South Wales resident of New South Wales, Other Wales?:

Other: Crown land is important for conservation of biodiversity and wider ecosystems, and protecting vegetation for carbon capture

12. What use/s of Crown land do you value?: Open or green space, Community use, Aboriginal land rights, Biodiversity, Other

Other: Protecting the wider landscape ecosystem Carbon capture

Please provide your feedback

13. These are the best priorities for Crown land over the next 10 years.: Neutral

14. Please rate each of the priorities from 'Very important' to 'Not important at all'.

Enable jobs growth, commercial opportunities and sustainable economic progress in regional and rural NSW.: Of minor importance

Expand green space, sustainable quality of life and climate change resilience: Very important

Strengthen and support evolving community connections: Important

Work with Aboriginal communities to realise the potential of their land rights: Very important

Do you believe that any changes should be made to these priorities, or are there any new priorities, you would like to suggest?:

Economic growth is not compatible with protection of the environment. The economy is dependent on people/community/society, which in turn is dependent on the environment. Hence economic matters should be given the lowest priority. On the issue of crown land, protecting crown land as areas where people can enjoy and coexist with the natural environment will automatically bring people to existing towns near those areas, creating a demand for goods and services (that is, if you protect the environment, the economy will take care of itself). The only reason you have only listed jobs and economic matters as the first priority is for political reasons. And in doing so you are perpetuating the on-going misunderstanding that the economy is separate from the environment, just as important as the environment and requires equal consideration.

Please provide your feedback

15. These are the best outcomes for Crown land over the next 10 years.: Disagree

16. Please rate each of the outcomes from 'Very important' to 'Not at all important'.

- Support innovative and sustainable regional industries: Neutral
- Expand regional tourism: Neutral
- Assist new sustainable energy, resources and infrastructure projects: Neutral
- Facilitate investment on Crown land: Not at all important
- Prioritise the use of Crown land for green and open space in urban areas: Very important
- Use Crown land to expand access to affordable housing: Not at all important
- Support and restore environmental values on Crown land: Very important
- Manage Crown land to build resilience in a changing climate: Very important
- Sustain the places where people come together: Neutral
- Partner with the organisations that serve our communities: Neutral
- Strengthen and uphold compliance to ensure a fair go: Neutral
- Make Aboriginal land transfers a priority – and see them as an opportunity: Very important
- Contribute to the ongoing recognition of native title rights: Very important
- Explore co-management of land to generate mutual benefits: Neutral
- Collaborate with Aboriginal groups in each place to improve outcomes: Very important
- Do you believe that any changes should be made to these outcomes or would you like to suggest any other: See previous response. There is so little crown land left that it should be conserved for protection of biodiversity, landscape ecosystems and carbon capture. Low impact sustainable use of such areas (including for Aboriginal

outcomes the department should address in the State Strategic Plan?:

cultural purposes and recreation) is compatible with this objective if well managed. Clearing crown land to make way for something else should be avoided at all costs.
